Chapter 1

THE HISTORICAL DEVELOPMENT OF MICROBIOLOGY	1
<i>Microscopy</i>	1
<i>Spontaneous Generation</i>	3
<i>Fermentation and Biochemical Physiology</i>	4
<i>Infectious Disease</i>	6
<i>Viruses</i>	7
<i>Immunity</i>	9
<i>Chemotherapy</i>	10
<i>Variation and Genetics</i>	11
<i>Reconsideration</i>	12

Chapter 2

LABORATORY METHODS	14
<i>Sterilization</i>	14
<i>Preparation of Culture Mediums</i>	15
<i>Microscopic Examination</i>	19
Motility, 19; Staining, 19; The Gram Stain, 21.	
<i>Culture of Bacteria</i>	22
Methods of Obtaining Pure Cultures, 22; Carbon Dioxide Tension, 23; Cultivation of Obligate Anaerobes, 24.	
<i>Systematic Study of Bacteria in Pure Culture</i>	25
<i>Animal Inoculation</i>	25
Routes of Inoculation, 25.	
<i>Immunological Methods</i>	27
The Precipitin Reaction, 28; Agglutination, 29; Complement Fixation, 31.	

Chapter 3

THE PHYSICAL AND CHEMICAL STRUCTURE OF THE MICROBIAL CELL	35
<i>Microscopy</i>	37
The Compound Microscope, 37; The Darkfield Microscope, 37; The Phase Microscope, 37; The Electron Microscope, 38.	

<i>The Morphology of Bacteria</i>	38
Shape, 38; Involution Forms, 41.	
EXTERNAL STRUCTURES.....	43
Flagella, 43; Capsules, 45.	
THE CELL WALL AND PLASMA MEMBRANE.....	47
The Cell Wall, 48; The Plasma Membrane, 50; Osmotic Regulation, 50; Bacterial Protoplasts, 51.	
INTERNAL STRUCTURES.....	52
The Bacterial Spore, 52; Staining Reactions, 55; The Gram Stain, 56; The Acid-Fast Stain, 57; The Bacterial Nucleus, 57; Protoplasmic Granules, 60.	
INTRACELLULAR LOCALIZATION OF ENZYMES.....	61
<i>The Morphology of Rickettsias and Viruses</i>	65
Inclusion Bodies, 67; The Structure of the Virus Particle, 68.	
THE BACTERIAL VIRUSES (BACTERIOPHAGES).....	69
ANIMAL VIRUSES.....	72
The Psittacosis-Lymphogranuloma Group, 72; The Pox Group of Viruses, 73; The Spherical Viruses, 73; The Insect Viruses, 76.	
PLANT VIRUSES.....	77
Tobacco Mosaic Virus, 78; Bushy Stunt Virus, 79.	
<i>Comparative Morphology of Microorganisms</i>	79

Chapter 4

THE GROWTH OF MICROORGANISMS	81
<i>The Growth of Bacteria</i>	81
The Lag Phase, 85; The Exponential Growth Phase, 85; Cessation of Cell Division, 86; Morphological Variation, 87.	
<i>The Replication of Viruses</i>	87
Characteristics of Virus Replication, 88; Adsorption of the Virus Particle, 89; Infection of the Bacterium, 90; Vegetative Virus, 90; Lysogeny, 92; Egg Culture, 94; Tissue Culture, 95; Developmental Stages, 96; Host Cells and Tissues, 99; Multiple Infections, 101; Interference, 102.	
<i>The Comparative Physiology of Growth</i>	103

Chapter 5

BACTERIAL METABOLISM	105
<i>Respiration</i>	106
Some Basic Concepts of Respiration, 106; Energy Sources for Bacteria, 107; Mechanism of Biological Oxidation, 108; Respiratory Enzymes in Bacteria, 108; The Relation of Bacteria to Molecular Oxygen, 112; Conservation and Transfer of the Energy Released in Biological Oxidations, 113.	
<i>Carbohydrate Metabolism</i>	115
Metabolism of Complex Carbohydrates, 115; Breakdown of Hexoses and Pentoses, 118; Relative Importance of Different Pathways of Glucose Metabolism, 124; Breakdown of Pyruvic Acid, 126; Reactions of Pyruvic Acid, 127; The Tricarboxylic	

Acid Cycle, 130; Oxidative Assimilation, 131; Heterotrophic Assimilation of CO ₂ , 132; Bacterial Fermentations, 133.	
<i>Fat Metabolism</i>	134
<i>Metabolism of Amino Acids and Proteins</i>	135
Breakdown of Proteins, 135; Breakdown of Amino Acids, 135; Synthesis of Amino Acids, 138; Synthesis of Proteins, 146.	
<i>Metabolism of Nucleic Acids and Related Substances</i>	147
Breakdown of Nucleic Acids, 148; Primary Synthesis of Purines and Pyrimidines, 148; Interconversion of Purines and Pyrimidines, 148; Synthesis of Nucleic Acids, 150; Inter-relationships in the Synthesis of DNA, RNA, and Protein, 151.	
<i>Nutrition of Bacteria</i>	152
Growth Factors, 152; The Vitamin B Group, 152; Amino Acids, 159; Purines and Pyrimidines, 160; Miscellaneous Organic Growth Factors, 161; The Inorganic Elements, 161; Microbiological Assay, 161.	
<i>Nitrogen Fixation</i>	162
Agents of Biological Nitrogen Fixation, 162; Mechanism of Nitrogen Fixation, 164.	
<i>Autotrophic and Photosynthetic Bacteria</i>	164
Chemo-autotrophes, 165; Photosynthetic Bacteria, 168.	
<i>Nitrogen and Carbon Cycles</i>	169

Chapter 6

PHYSICAL AGENTS, BACTERICIDAL SUBSTANCES (DISINFECTANTS), AND CHEMOTHERAPEUTIC DRUGS	172
Physical Agents.....	172
Temperature Relations, 172; The Lethal Effects of Heat, 174; Cold, 175; Drying, 176; Radiation, 177; Electrophoresis, 179; Cell Disintegration, 179.	
Disinfectants.....	180
Inorganic Compounds, 180; Organic Compounds, 182; Gaseous Disinfectants, 185; The Mechanisms of Bactericidal Action, 187; The Standardization of Disinfectants, 191.	
The Chemotherapeutic Drugs.....	193
<i>Synthetic Compounds</i>	194
The Sulfones, 194; Aminohydroxy Benzoic Acids, 195; Thiosemicarbazones, 195; Pyridine Carboxylic Acid Compounds, 196; Sulfonamide Compounds, 196.	
<i>The Antimetabolite Theory of Antibacterial Activity</i>	197
Enzyme Inhibition, 197.	
<i>Antibiotic Substances</i>	199
Antibiotic Substances from Bacteria, 201; Antibiotics Produced by Higher Fungi, 201.	
<i>The Application of Chemotherapeutic Agents</i>	205
Assay of Activity, 205; Sensitivity Tests, 206; Secondary Infections, 208; Combined Therapy, 209; Intracellular Infections, 210; Other Applications, 212.	

Chapter 7

MICROBIAL VARIATION AND GENETICS	213
<i>The "Unique" Features of Microorganisms</i>	213
<i>Observed Variations of Microorganisms</i>	215
Bacterial Dissociation, 216; Variation in Cell Structures, 218; Aberrant Forms, 220; Microbial Life Cycles, 221.	
ENVIRONMENTAL SELECTION.....	223
ADAPTATION.....	224
ATTENUATION.....	225
Loss of Virulence, 225; Animal Passage, 225; Modification of Virulence, 225.	
BIOCHEMICAL VARIATION.....	226
Adaptation and Training, 226; Discontinuous Variations, 226.	
RESISTANCE TO CHEMOTHERAPEUTIC AGENTS.....	227
Resistance Acquired <i>in Vivo</i> , 228; Induced Resistance, 229; Physiology of Resistance, 230.	
<i>Adaptive Enzymes</i>	232
<i>Recombination</i>	234
Bacterial Sexuality, 234; Viral Recombination, 234.	
<i>Transduction</i>	235
The Transformation Reaction, 237; Transformation Factors, 237; Other Transformations, 238.	
The Nature of Microbial Variations.....	238
<i>Mutation</i>	239
Spontaneous Mutation, 239.	
<i>Induced Adaptation</i>	240
Enzyme Balance, 241; Induction and Mutation, 242.	
Microbial Phylogeny.....	243

Chapter 8

THE TAXONOMY OF MICROORGANISMS	246
Nomenclature, 248; Genera, 248; Species, 249; Types, 249.	

Chapter 9

THE PATHOGENIC MICROORGANISMS AND DISEASE	252
<i>The Specific Microbial Etiology of Infectious Disease</i>	252
Koch's Postulates, 252; Multiple Etiology, 255.	
Microbial Virulence.....	256
Measurement of Virulence, 256.	
<i>Microbial Toxins</i>	259
Exotoxins, 259; Endotoxins, 261; Other Toxic Substances, 263; Capsules, 268; Miscellaneous Factors, 269; Toxicity of Host Origin, 269.	

Resistance..... 271
 Species, Racial, and Inherited Resistance, 272; Races of Man, 273; Age, 274; Sex, 276; Climate and Season, 277; General Physiological Well-Being, 277; The External Defenses of the Organism, 279; Internal Defenses, 281; Normal Flora, 283.

Chapter 10

THE EPIDEMIOLOGY OF INFECTIOUS DISEASE..... 284
 The Carrier, 285.
Epidemiological Types of Infectious Disease..... 286
 Air-Borne Infection, 287.
The Microbial Population..... 289
The Host Population..... 290
 Intrinsic Factors, 290; Extrinsic Factors, 290.
The Interaction of Host and Parasite Populations..... 291
 Theoretical Analysis, 292; Herd Immunity, 293; Long-Term Relationship, 294.
Experimental Epidemiology..... 295
Epidemiological Data and Their Interpretation..... 297
 Geographical Distribution, 297; Prevalence of Disease, 297; Seasonal Distribution, 297; Age Distribution, 297.
The Control of Infectious Disease..... 298
 Diseases of Lower Animals Transmissible to Man, 298; Insect-Borne Diseases, 299; Diseases Transmitted from Man to Man, 299.

Chapter 11

THE MICROBIOLOGY OF WATER AND SEWAGE..... 300
Water..... 300
 Bacteria Native to Natural Waters, 301; Bacterial Contamination of Natural Waters, 301; Factors Influencing the Kinds and Numbers of Bacteria, 303; The Bacteriological Analysis of Water, 304; Chemical Analysis, 306; The Assay of the Sanitary Quality of Water, 306; The Purification of Water Supplies, 308.
Sewage..... 310

Chapter 12

THE MICROBIOLOGY OF MILK AND FOOD..... 312
Milk..... 312
 Sources of Bacteria in Milk, 312; Bacteria from Infected Cattle, 312; Bacteria from External Sources, 313; The Pathogenic Bacteria from External Sources, 314; The Bactericidal Property of Fresh Milk, 315; The Determination of the Quality of Milk, 315; The Hygienic Control of Milk, 317; The Regulation of Milk Quality, 319.

Food Poisoning and Food-Borne Infection.....	319
Food Poisons of Bacterial Origin, 320; Food-Borne Bacterial Infections, 321; Shellfish and Disease, 322; Food-Borne Parasitic Infections, 322.	

Chapter 13

IMMUNITY: Antigens, Antibodies, and the Antigen-Antibody Reaction	323
Antigens.....	324
Relative Antigenicity, 324; Adjuvants, 324.	
<i>Properties of Antigens</i>	325
Size and Nature, 325; Degradation, 326; Alien Nature, 326.	
<i>Antigenic Specificity</i>	326
Species Specificity, 327; Isophile Antigens, 327; Iso-Antigens, 329; Heterogenetic Antigens, 330; Acquired Tolerance, 331.	
<i>The Chemical Basis of Specificity</i>	331
Haptenes, 333.	
<i>The Antigenic Structure of Bacteria</i>	334
Antibodies.....	336
Nature of Antibody, 336; Heterogeneity of Antibody, 341; Purification of Antibody, 343.	
The Antigen-Antibody Reaction.....	344
Specificity, 344; Intermolecular Forces, 345; Valence, 345; Complex Formation, 346; Mathematical Analysis, 348.	

Chapter 14

IMMUNITY—The Serological Reactions	350
<i>Precipitins</i>	350
The Quantitative Precipitin Reaction, 351; Precipitin Reactions in Gels, 351; Precipitin Reactions with Haptenes, 352; Cross-Reactions, 353.	
<i>Agglutinins</i>	353
Conglutination and Conglutinating Complement Absorption, 354; Passive Agglutination, 354; Cross-Reactions, 355; Agglutinin Absorption, 355; H and O Agglutination, 356; Spontaneous Agglutination, 356; Cold Agglutinins, 356; The Mechanism of Agglutination, 357; Blocking Antigens, 358.	
<i>Antitoxins</i>	358
The Toxin-Antitoxin Reaction, 359; The Standardization of Antitoxins, 359; Antibody to Enzymes, 361.	
<i>Lysins</i>	362
Pfeiffer Phenomenon, 362; Hemolysis, 362; Complement, 362; Mechanism of the Lytic Reaction, 364; Complement Fixation, 365.	
<i>Opsonins</i>	367
The Opsonic Index, 367; The Factors Influencing Phagocytosis, 367; The Process of Phagocytosis, 368; The Fate of Ingested Bacteria, 369; The Nature of the Opsonic Activity, 370.	
<i>Protective and Neutralizing Antibodies</i>	370
Protection Tests, 370; Neutralization Tests, 371.	

Chapter 15

THE IMMUNE STATE	372
Humoral Immunity	372
Antitoxic Immunity, 373; Antibacterial Activity, 373; Reproduction-Inhibiting Activity, 373; Essential Immunizing Antigens, 374.	
Cellular Immunity	375
The Systems of Cells, 376; Local Defense, 376; General Defense, 377; The Cellular Response in Immunity, 377.	
<i>Sites of Antibody Formation</i>	377
Local Immunity, 380.	
Natural Immunity	382
Specific Immunity, 382.	
Acquired Immunity	384
<i>Active Immunity</i>	384
<i>Passive Immunity</i>	386
Hypersensitivity	387
<i>Anaphylaxis</i>	388
Anaphylactic Shock, 388; The Arthus Phenomenon, 391; Serum Sickness, 392.	
<i>Allergy and Atopy</i>	392
Heredity, 393; Forms of Allergy, 393; Allergic Antigen and Antibody, 394.	
<i>Hypersensitivity in Infection</i>	395
<i>The Relationship of Hypersensitivity and Immunity</i>	396

Chapter 16

THE STAPHYLOCOCCI	398
Morphology and Staining, 398; Physiology, 398; Toxins, 399; Variation, 401; Differentiation and Classification, 402; Pathogenicity, 403; Bacteriological Diagnosis, 405; Immunity, 406; Chemotherapy, 406.	
<i>Other Micrococci</i>	407

Chapter 17

THE STREPTOCOCCI	408
Morphology and Staining, 408; Physiology, 409; The Formation of Toxic Substances, 410; Variation, 411; Classification, 412; Pathogenicity for Animals, 417; Pathogenicity for Man, 418; Epidemiology of Streptococcal Disease, 419; Immunity to Streptococcal Infection, 420; Chemotherapy, 421; Bacteriological Diagnosis of Streptococcal Infection, 421.	
<i>Streptococcal Infection of the Skin and Subcutaneous Tissues</i>	422
Erysipelas, 422; Wound Infection, 422.	

<i>Streptococcal Infection of the Upper Respiratory Tract</i>	423
Streptococcus Sore Throat (Septic Sore Throat), 423.	
<i>Scarlet Fever</i>	424
The Erythrogenic Toxin, 425; Scarlet Fever Antitoxin, 425;	
Prophylactic Inoculation, 425.	
<i>Rheumatic Fever</i>	426
<i>Acute Glomerulonephritis</i>	427
<i>Subacute Bacterial Endocarditis</i>	428
<i>Puerperal Fever</i>	428

Chapter 18

THE PNEUMOCOCCI	430
Morphology and Staining, 430; Physiology, 431; Toxins, 432;	
Classification, 433; Variation, 435; Pathogenicity for Man, 435;	
Bacteriological Diagnosis of Pneumococcus Infections, 438;	
Chemotherapy, 438; Pathogenicity for Lower Animals, 438;	
Immunity, 439.	

Chapter 19

THE GRAM-NEGATIVE PATHOGENIC COCCI (NEISSERIA): THE GONOCOCCUS AND THE MENINGOCOCCUS	440
<i>The Gonococcus</i>	440
Morphology and Staining, 440; Physiology, 441; Toxins, 443;	
Variation, 443; Classification, 444; Pathogenicity for Man, 444;	
Bacteriological Diagnosis of Gonococcus Infection, 445; Chemo-	
therapy, 446; Pathogenicity for Lower Animals, 446; Immunity,	
446.	
<i>The Meningococcus</i>	447
Morphology and Staining, 447; Physiology, 448; Toxins, 449;	
Variation, 449; Classification, 449; Pathogenicity for Man, 450;	
Chemotherapy, 453; Bacteriological Diagnosis of Meningo-	
coccus Infection, 453; Pathogenicity for Lower Animals, 453;	
Immunity, 454.	
<i>Other Gram-Negative Diplococci</i>	454
The Pigmented Forms, 455; The Anaerobic Species, 455.	

Chapter 20

THE ENTERIC BACILLI: The Coliform Bacteria, Friedländer's Bacillus (Pneumobacillus), and Proteus	456
<i>Classification of Enteric Bacilli</i>	456
Biochemical Differentiation, 457.	
The Coliform Bacilli.....	459
Morphology and Staining, 460; Physiology, 460; Variation, 461;	
Toxins, 461.	
<i>Physiological Differentiation of Coliform Bacilli</i>	461
<i>The Immunological Relationships of the Coliform Bacilli</i>	462
Pathogenicity for Man, 463; Pathogenicity for Lower Animals,	
463.	

Friedländer's <i>Bacillus</i> (<i>Klebsiella Pneumoniae</i>).....	463
Immunological Types, 464; Pathogenicity, 464.	
The Paracolon Bacilli.....	465
The Ballerup-Bethesda Group, 465; The Arizona Group, 466; The Providence Group, 466.	
<i>Proteus</i>	467
Morphology and Staining, 467; Physiology, 467; Antigenic Structure, 468; Pathogenicity, 468; Morgan's <i>Bacillus</i> , 469.	

Chapter 21

THE ENTERIC BACILLI: The Salmonella Group	470
Morphology and Staining, 470; Physiology, 470; Toxins, 471; Immunological Differentiation, 471; Antigenic Structure, 472; Classification, 473; Variation, 474; Phage Typing, 475; Ecology, 476; Bacteriological Diagnosis of <i>Salmonella</i> Infection, 476; Pathogenicity for Lower Animals, 477.	
<i>Salmonella</i> Infections.....	478
<i>Salmonella Gastroenteritis</i>	478
<i>Salmonella Typhi-murium</i> , 479; <i>Salmonella Enteritidis</i> , 480; <i>Salmonella Cholerae-Suis</i> , 480.	
<i>Typhoid and Paratyphoid Fevers</i>	480
Paratyphoid Fever, 481; Typhoid Fever, 482; Chemotherapy, 484; Carriers, 484; Epidemiology, 485; Immunity, 486.	
<i>Alcaligenes Fecalis</i>	489

Chapter 22

THE ENTERIC BACILLI: The Dysentery Bacilli	491
Classification, 491.	
<i>The Non-Mannitol-Fermenting Shigellae</i>	492
<i>Shigella Shigae</i> , 492; <i>Shigella Parashigae</i> , 493; <i>Shigella Am-</i> <i>bigua</i> , 493.	
<i>The Mannitol-Fermenting Shigellae</i>	494
<i>Shigella Flexneri</i> , 494; <i>Shigella Boydii</i> , 495; <i>Escherichia</i> <i>Alkalescens</i> , 495.	
<i>The Slow Lactose-Fermenting Shigellae</i>	496
<i>Shigella Sonnei</i> , 496; <i>Escherichia Dispar</i> , 497.	
<i>Bacillary Dysentery</i>	497
Pathogenicity for Man, 497; Bacteriological Diagnosis, 498; Chemotherapy, 498; Epidemiology, 498; Immunity, 500; Pathogenicity for Lower Animals, 501.	

Chapter 23

THE CHOLERA VIBRIO AND RELATED FORMS	502
<i>Vibrio Cholerae</i>	502
Morphology and Staining, 502; Physiology, 503; Toxin, 505; Antigenic Structure, 505; Variation, 506; Pathogenicity for	

Man, 507; Bacteriological Diagnosis, 508; Chemotherapy, 508; Epidemiology, 508; Immunity, 510; Pathogenicity for Lower Animals, 511.	
Paracholera Vibrios and Non-Cholera Vibrios.....	512
The El Tor Vibrios, 512; The Celebes Vibrio, 513; Other Pathogenic Vibrios, 513.	
 <i>Chapter 24</i>	
BRUCELLA: Undulant Fever; Contagious Abortion of Cattle	514
Morphology and Staining, 514; Physiology, 514; Antigenic Structure, 516; Toxin, 517; Variation, 517; Pathogenicity for Lower Animals, 517; Pathogenicity for Man, 519; Bacteriological Diagnosis, 520; Chemotherapy, 521; Immunity, 521.	
<i>Brucella Bronchiseptica</i>	522
 <i>Chapter 25</i>	
PASTEURILLA AND ACTINOBACILLUS: Hemorrhagic Septicemia; Plague; Tularemia; Glanders; Actinobacillosis	523
<i>Pasteurella Pestis—The Plague Bacillus</i>	523
Morphology and Staining, 524; Physiology, 525; Toxin, 526; Pathogenicity for Man, 526; Bacteriological Diagnosis, 530; Chemotherapy, 530; Immunity, 530.	
<i>Pasteurella Pseudotuberculosis</i>	531
<i>Pasteurella Tularensis</i>	531
Morphology and Staining, 531; Physiology, 532; Pathogenicity, 532; Bacteriological Diagnosis, 534; Chemotherapy, 534; Immunity, 534.	
Actinobacillus.....	535
<i>The Glanders Bacillus (Actinobacillus Mallei)</i>	535
Morphology and Staining, 535; Physiology, 536; Classification, 536; Pathogenicity for Lower Animals, 536; Pathogenicity for Man, 537; Bacteriological Diagnosis, 537; Chemotherapy, 538; Immunity and Prophylaxis, 539.	
<i>Actinobacillus Whitmori (Actinobacillus Pseudomallei)</i>	539
Actinobacillosis.....	539
Actinobacillus Lignieresii, 539; Actinobacillus Actinoides, 540; Actinobacillus Actinomycetem-comitans, 540.	
 <i>Chapter 26</i>	
THE HEMOPHILIC BACTERIA	541
<i>Hemophilus Influenzae (Pfeiffer's Bacillus)</i>	541
Morphology and Staining, 541; Physiology, 541; Varieties, 543; Variation and Antigenic Structure, 543; Toxins, 543; Pathogenicity for Man, 543; Chemotherapy, 544; Pathogenicity for Lower Animals, 544.	
<i>The Koch-Weeks Bacillus</i>	544

<i>Hemophilus Pertussis</i>	545
Morphology and Staining, 545; Physiology, 546; Toxins, 546; Variation and Antigenic Structure, 546; Pathogenicity for Man, 547; Pathogenicity for Animals, 547; Bacteriological Diagnosis, 548; Chemotherapy, 548; Epidemiology, 548; Immunity, 548.	
<i>The Morax-Axenfeld Diplobacillus (Hemophilus Duplex)</i>	549
<i>Ducrey's Bacillus (Hemophilus Ducreyi)</i>	550

Chapter 27

PSEUDOMONAS; LACTOBACILLUS; LISTERIA; ERYSIPELOTHRIX; BACTEROIDES; STREPTOBACILLUS; BARTONELLA; PLEUROPNEUMONIA GROUP; DONOVANIA	551
<i>Pseudomonas Aeruginosa (Pyocyanea)</i>	551
Morphology and Staining, 551; Physiology, 551; Pathogenicity, 552.	
<i>Lactobacillus</i>	553
Physiology, 553; Classification, 553; <i>Lactobacillus Acidophilus</i> , 554; <i>Lactobacillus Bifidus</i> , 555; <i>Lactobacillus Bulgaricus</i> , 555.	
<i>Dental Caries and Periodontal Disease</i>	555
<i>Related Bacteria</i>	558
Microbacterium, 558; Propionic Acid Bacteria, 558.	
<i>Listeria</i>	558
Pathogenicity for Animals, 559; Pathogenicity for Man, 559.	
<i>Erysipelothrix Rhusiopathiae</i>	559
Morphology and Physiology, 560; Pathogenicity, 560; Immunity, 561.	
Non-Spore-Forming Anaerobic Bacilli (Bacteroides)	562
<i>Bacteroides Fusiformis</i> , 563; <i>Bacteroides Fragilis</i> , 563; <i>Bacteroides Funduliformis</i> , 563; <i>Bacteroides Ramosus</i> , 565; <i>Bacteroides Melaninogenicus</i> , 565; <i>Bacteroides Pneumosintes</i> , 565.	
<i>Streptobacillus Moniliformis (Rat-Bite Fever, Haverhill Fever)</i>	565
<i>Bartonella</i>	566
<i>Bartonella Bacilliformis</i> , 566; Bartonellosis of Animals, 568; The Systematic Position of <i>Bartonella</i> , 569.	
The Pleuropneumonia-like Organisms	569
Morphology and Staining, 569; Physiology, 571; Varieties, Strains, or Species, 571.	
<i>Donovania Granulomatis</i>	574

Chapter 28

BACILLUS—THE SPORE-FORMING AEROBES	577
<i>Bacillus Anthracis</i>	577
Morphology and Staining, 577; Physiology, 578; Variation, 579; Toxins, 579; Pathogenicity for Lower Animals, 580; Patho-	

genicity for Man, 581; Bacteriological Diagnosis, 582; Chemotherapy, 582; Immunity, 582.

Related Bacilli 584

Chapter 29

CLOSTRIDIUM—THE SPORE-FORMING ANAEROBES 586

Clostridium Tetani 587
Morphology, 587; Physiology, 588; Antigenic Structure, 589; Tetanus Toxin, 589; Pathogenicity, 591; Immunity, 592; Chemotherapy, 594.

Gaseous Gangrene 594

The Vibrio Septique, Clostridium Septicum 595
Morphology, 595; Physiology, 596; Antigenic Structure and Toxin, 596; Pathogenicity, 596.

Clostridium Welchii (Clostridium Perfringens) 597
Morphology, 597; Physiology, 597; Types, 598; Toxins, 598; Pathogenicity for Man, 600; Pathogenicity for Animals, 601.

Clostridium Noryi (Clostridium Oedematiens) 601
Morphology, 601; Physiology, 602; Antigenic Structure and Toxin, 602; Pathogenicity for Man, 602; Pathogenicity for Animals, 602.

Clostridium Histolyticum 603
Morphology, 603; Physiology, 603; Pathogenicity, 604.

Clostridium Sporogenes 604
Morphology, 605; Pathogenicity, 605.

Blackleg (*Clostridium Chauvei*) 606
Morphology, 606; Physiology, 606; Pathogenicity, 606; Immunization, 607.

Clostridium Botulinum 607
Morphology, 607; Physiology, 607; Types, 608; Toxins, 608; Pathogenicity for Man, 609; Pathogenicity for Lower Animals, 610; Immunity, 611.

Chapter 30

CORYNEBACTERIUM (THE DIPHTHERIA BACILLUS) 612

Morphology and Staining, 612; Physiology, 613; Toxin, 615; Variation, 616; Types, 617; Pathogenicity for Man, 618; Pathogenicity for Lower Animals, 619; Bacteriological Diagnosis, 620; Immunity, 621; Prophylactic Immunization, 622; Passive Immunity, 623; Epidemiology, 623; The Control of Diphtheria, 625.

The Diphtheroid Bacilli 626

Chapter 31

MYCOBACTERIUM 628

The Tubercle Bacilli 628

Morphology and Staining, 628; Physiology, 629; Chemical Composition, 631; Resistance, 632; Variation, 632; Pathogenicity for Man, 633; Bacteriological Diagnosis, 636; Chemotherapy, 637; Immunity, 639; Pathogenicity for Lower Animals, 642; Epidemiology, 644.	
<i>The Bacillus of Leprosy (Mycobacterium Leprae)</i>	646
Morphology and Staining, 646; Cultivation, 646; Pathogenicity, 647; Transmission, 647; Chemotherapy, 648; Immunity, 649; Rat Leprosy, 649.	
<i>Other Acid-Fast Bacilli</i>	650
Mycobacterium Paratuberculosis, 650; The Vole Bacillus, 650; The "Cold-Blooded" Mycobacteria, 650; The Saprophytic Acid-Fast Bacilli, 650.	

Chapter 32

MEDICAL MYCOLOGY: THE PATHOGENIC ACTINOMYCETES, MOLDS, YEASTS AND RELATED MICROORGANISMS	652
The Actinomycetes	654
<i>Actinomyces Bovis</i>	655
Morphology and Staining, 656; Physiology, 658; Pathogenicity for Animals, 658; Pathogenicity for Man, 659; Immunity, 661; Isolation and Diagnosis, 661.	
<i>Mycetoma</i>	661
Actinomycotic Mycetoma, 662; Maduromycosis, 662; Diagnosis, 663.	
<i>Other Nocardia Infections</i>	663
The Molds and Mold-like Fungi	664
Hyphae and Mycelium, 664; Spore Formation, 665; Fungi Imperfecti, 665; Differential Characteristics of Genera and Species, 666; Microscopic Examination, 667; Cultivation, 668.	
<i>Aspergillus (Aspergillois)</i>	668
Pathogenicity for Animals, 669; Pathogenicity for Man, 669.	
<i>Fonsecaea Pedrosoi (Chromoblastomycosis)</i>	670
<i>Sporotrichum Schenckii (Sporotrichosis)</i>	671
Pathogenicity for Man, 672; Epidemiology, 673; Diagnosis, 673; Immunity, 673.	
<i>The Dermatophytes</i>	673
Differentiation of Genera and Species, 675; Pathogenicity, 676; Immunity, 680; Characteristics of Dermatophyte Species, 681; Diagnosis, 684.	
Yeasts and Yeast-like Fungi	686
<i>Cryptococcus Neoformans (Torula Histolytica)</i>	687
Cryptococcosis, 687; The Causative Organism, 689.	
<i>Blastomyces Dermatitidis (North American Blastomycosis)</i>	690
The Causative Organism, 690; Pathogenicity, 691; Immunity, 692; Diagnosis, 693.	
<i>Candida Albicans (Monilia Albicans)</i>	693
The Causative Organism, 694; Pathogenicity, 694.	
<i>Coccidioides Immitis</i>	696

The Causative Organism, 696; Pathogenicity, 697; Immunity, 699; Diagnosis, 700; Epidemiology, 700.

Paracoccidioidomycosis 700

Histoplasma Capsulatum 701

The Causative Organism, 701; Pathogenicity, 702; Epidemiology, 703; Diagnosis, 703.

Chapter 33

THE SPIROCHETES 704

The Spirochetes of the Relapsing Fevers (*Borrelia*) 704

Morphology, 704; Cultivation, 705; Classification, 705; Pathogenicity, 706; Immunity, 707; Diagnosis, 708; Epidemiology, 708.

Spirochetes of the Mouth 710

Treponema and the *Treponematoses* 710

Cultivation, 711; Pathogenicity for Animals, 711; Immunity, 712.

Syphilis (Treponema Pallidum) 712

The Disease in Man, 713; Immunity, 714; Serodiagnosis, 715; Chemotherapy, 717.

Yaws (Treponema Perluene) 718

Pinta (Treponema Caraleum) 719

Etiology, 720; The Disease in Man, 720; Transmission, 720.

Leptospira and *Leptospirosis* 721

Morphology, 721; Cultivation, 721; Antigenic Structure, 721; Pathogenicity, 722; Laboratory Diagnosis, 722; Chemotherapy, 722.

Weil's Disease (Infectious Jaundice) 722

Disease in Man, 724; Immunity, 724; Transmission, 724.

Canine Leptospirosis 724

Swamp Fever 725

Leptospiral Infections of the Far East 725

Saprophytic Leptospira 726

Rat-Bite Fever (*Spirillum Morsus Muris*) 726

Chapter 34

MEDICAL PARASITOLOGY 728

The Protozoa 728

THE INTESTINAL AMEBAE (RHIZOPODA) 729

Entamoeba Histolytica, 729; Other Species of Amebae Parasitic in Man, 733.

CILIOPHORA 733

INTESTINAL FLAGELLATES (MASTIGOPHORA) 734

HEMOFLAGELLATES (MASTIGOPHORA) 734

The Trypanosomes, 735; *Trypanosoma Gambiense*, 735; *Trypanosoma Cruzi*, 738; Other Species of *Trypanosoma*, 739;

The Leishmanias, 740; Leishmania Donovanii, 740; Leishmania Tropica, 742; Leishmania Braziliensis, 742.	
SPOROZOA	742
Malarial Parasites, 742.	
PARASITES OF UNCERTAIN AFFINITIES	749
Toxoplasma Gondii, 749; Sarcocystis, 751.	
<i>The Metazoa</i>	751
PLATYHELMINTHES	751
Trematoda, 751; Paragonimus Westermanni, 751; Fasciolopsis Buski, 755; Heterophyes Heterophyes, 755; Other Intestinal Trematodes, 756; Clonorchis Sinensis, 756; The Human Blood Flukes, 756; Other Species, 759; Cestoda, 759; Taenia Solium, 759; Taenia Saginata, 761; Echinococcus Granulosus, 761; Echinococcus Alveolaris, 762; Hymenolepis Nana, 762; Tape-worms of Lower Animals, 763; Diphyllbothrium Latum, 764.	
NEMATODA	765
Enterobius Vermicularis, 766; Trichuris Trichiura, 767; Ascaris Lumbricoides, 767; Hookworms, 768; Strongyloides Stercoralis, 772; Trichinella Spiralis, 773; Wuchereria Bancrofti, 775; Other Species of Filarial Worms, 777.	

Chapter 35

RICKETTSIA	778
Relation to Bacteria and Viruses, 778; Morphology, 779; Physiology, 780; Pathogenicity, 782; Chemotherapy, 783; Immunity, 783; Classification, 785.	
The Typhus Fevers	787
<i>Epidemic Louse-Borne Typhus Fever</i>	788
Brill's Disease, 788.	
<i>Murine Typhus</i>	788
<i>Immunization</i>	790
Inactivated Vaccine, 790; Attenuated Vaccine, 790.	
The Spotted Fevers	791
Rocky Mountain Spotted Fever, 791; Immunization, 792.	
<i>Related Rickettsial Infections</i>	792
Boutonneuse Fever, 792; North Queensland Tick Typhus, 792; Siberian Tick Typhus, 792.	
<i>Rickettsialpox</i>	793
Tsutsugamushi Disease (Scrub Typhus, Mite Typhus)	793
Q Fever	794
Disease in Man, 795; Infection in Lower Animals, 795.	
Trench Fever	796
Laboratory Diagnosis of Rickettsial Disease	796
Weil-Felix Reaction, 797; Specific Serological Reactions, 797.	

Chapter 36

THE PSITTACOSIS-LYMPHOGRANULOMA VENEREUM GROUP OF VIRUSES	798
--	-----

	Morphology and Staining, 798; Toxin, 799; Antigenicity, 800; Experimental Infections, 801; Chemotherapy, 802.	
Psittacosis and Ornithosis		803
	The Disease in Man, 804; The Disease in Lower Animals, 804; Immunity, 805; Epidemiology, 806.	
Lymphogranuloma Venereum		807
	The Disease in Man, 807; Pathogenicity for Animals, 807; Immunity, 808; Epidemiology, 808.	
Trachoma and Inclusion Conjunctivitis		808
<i>Trachoma</i>		808
<i>Inclusion Conjunctivitis</i>		809

Chapter 37

THE VIRUSES OF EXANTHEMATOUS DISEASE AND THE TUMOR VIRUSES		811
The Pox Group of Viruses		811
	Morphology, 811; Antigenicity, 812; Pathogenesis of Pox Disease, 813.	
<i>Variola and Vaccinia</i>		814
	Smallpox in Man, 815; Vaccinia and Immunization, 816; Experimental Infections, 818.	
<i>Varicella and Zoster</i>		819
	Varicella, 819; Zoster, 820; Relation of Varicella and Zoster, 820.	
<i>Pox Diseases of Lower Animals</i>		820
	Cowpox, 821; Mousepox, 821; Fowlpox, 821.	
The Herpes Viruses		822
<i>Herpes Simplex</i>		822
	The Disease in Man, 822; Immunity, 824; Experimental Infections, 824.	
<i>Herpetic Infections of Lower Animals</i>		825
Foot-and-Mouth Disease		826
Cat-Scratch Fever		827
Rubeola and Rubella		827
<i>Rubeola</i>		827
	The Disease in Man, 827; Experimental Infections, 828.	
<i>Rubella</i>		829
Infectious Mononucleosis		830
	The Disease in Man, 830; Experimental Infections, 830.	
Salivary Gland Disease Viruses		831
Tumor Viruses		832
<i>Molluscum Contagiosum</i>		833
<i>Myxoma and Fibroma Viruses</i>		833
	Infectious Myxomatosis, 834; Infectious Fibromatosis, 834; Fibroma-Myxoma Transduction, 835.	
<i>Rabbit Papilloma Virus</i>		835
	Infectious Papillomatosis, 835.	

<i>Virus-like Agents of Mouse Neoplastic Disease</i>	836
Mammary Carcinoma, 837.	
<i>Viruses of Avian Neoplastic Disease</i>	837
Avian Leucosis, 837; Fowl Sarcoma, 838.	

Chapter 38

THE INFLUENZA AND RELATED VIRUSES, INCLUDING MUMPS VIRUS (MYXO-VIRUSES); THE ADENOVIRUSES; AND OTHER RESPIRATORY VIRUSES	840
The Influenza Viruses	841
Morphology, 841; Toxin, 842; Hemagglutinin, 842; Antigenic Structure, 843; Variation, 844; Infection in Lower Animals, 847; The Disease in Man, 847.	
Influenza-like and Other Respiratory Viruses	848
Newborn Pneumonitis Virus, 849; Hemadsorption (HA) Viruses, 849; Croup-Associated (CA) Viruses, 850; Chimpanzee Coryza Agent (CCA), 850; 2060 Viruses, 850; Primary Atypical Pneumonia, 851; JH Virus, 851.	
<i>The Common Cold</i>	851
The Mumps and Related Viruses	852
<i>Mumps</i>	852
Disease in Man, 853; Experimental Infections, 854.	
<i>Newcastle Disease Virus</i>	854
NDV, 854; Disease in Chickens, 854; Disease in Man, 855.	
The Adenoviruses	856
Morphology and Growth, 856; Antigenic Structure, 857; Pathogenicity, 857.	

Chapter 39

THE ENTERIC VIRUSES: POLIOMYELITIS VIRUSES, COXSACKIE VIRUSES, ECHO VIRUSES; THE HEPATITIS VIRUSES	859
Poliomyelitis Viruses	859
Poliovirus, 860; Disease in Man, 861; Experimental Infections, 865; Immunity, 865.	
<i>Encephalomyelitis of Mice</i>	867
<i>Teschen Virus (Porcine Encephalomyelitis)</i>	867
Coxsackie Viruses	867
Virus Types, 868; Disease in Man, 870.	
Enteric Orphan Viruses	871
<i>ECHO Viruses</i>	871
Tissue Culture, 871; Antigenic Types, 872; Pathogenicity, 872.	
<i>Enteric Orphan Viruses of Lower Animals</i>	873
Viral Diarrheas	874
Viral Hepatitis	875
<i>Infectious Hepatitis</i>	875
Hepatitis Virus A, 876.	

<i>Serum Hepatitis</i>	876
Hepatitis Virus B, 876.	
<i>Hepatitis of Lower Animals</i>	877
Canine Hepatitis, 877; Murine Hepatitis, 877.	

Chapter 40

THE VIRUSES OF ARTHROPOD-BORNE DISEASE AND OTHER NEUROTROPIC VIRUSES	879
Yellow Fever	879
Disease in Man, 879; Experimental Infections, 880; Epidemiology, 881; Immunity, 883.	
The Arthropod-Borne Encephalitis and Related Viruses	883
<i>Equine Encephalomyelitis Viruses</i>	884
WESTERN EQUINE ENCEPHALOMYELITIS 884	
Disease in Man, 884; Experimental Infections, 885; Immunity, 885; Epidemiology, 885.	
EASTERN EQUINE ENCEPHALOMYELITIS 886	
Epidemiology, 886.	
VENEZUELAN EQUINE ENCEPHALOMYELITIS 887	
<i>St. Louis Encephalitis</i>	888
Disease in Man, 889; Epidemiology, 889.	
<i>Japanese B Encephalitis and Related Viruses</i>	890
JAPANESE B ENCEPHALITIS 890	
Disease in Man, 891; Epidemiology, 891.	
MURRAY VALLEY ENCEPHALITIS 891	
WEST NILE VIRUS 892	
<i>Dengue</i>	893
Disease in Man, 894; Epidemiology, 894.	
<i>Sandfly Fever</i>	895
Disease in Man, 895; Epidemiology, 896.	
<i>Rift Valley Fever</i>	896
<i>Russian Spring-Summer Encephalitis</i>	897
Disease in Man, 897; Epidemiology, 897.	
<i>Louping Ill</i>	898
<i>Kyasanur Forest Disease</i>	898
<i>Colorado Tick Fever</i>	899
Disease in Man, 899; Epidemiology, 900.	
<i>Epidemic Hemorrhagic Fever</i>	900
Other Arthropod-Borne Animal Viruses	901
<i>North American Isolates</i> 901	
California Virus, 901; Turlock Virus, 901.	
<i>South American Isolates</i> 901	
Anopheles Viruses, 901; Wyeomyia Virus, 902; Ilheus Virus, 902; Encephalomyelitis Viruses, 902; Mayaro Virus, 902.	
<i>African Isolates</i> 902	
Bwamba Fever Virus, 902; Semliki Forest Virus, 903; Ntaya Virus, 903; Bunyamwera Virus, 903; Uganda S Virus, 903; Zika Virus, 904; Sinbis Virus, 904; Chikungunya Virus, 904.	

CONTENTS	xxiii
Inter-relationships among Arthropod-Borne Viruses.....	904
Other Neurotropic Viruses.....	906
<i>Lymphocytic Choriomeningitis</i>	906
Disease in Man, 907; Experimental Infections, 907; Epidemiology, 907.	
<i>Encephalomyocarditis Viruses</i>	908
Disease in Man, 908.	
<i>Rabies</i>	909
Rabies Virus, 909; Infection in Lower Animals, 910; Disease in Man, 913; Prophylaxis, 914.	
 INDEX.....	 915
