

Table of Contents

1. General Laboratory Rules	1
Rules of Conduct	1
Housekeeping	4
Cooperation With the Nursing Staff	4
2. Specimens for Clinical Laboratory Examination	6
Hospital Regulations Concerning Collection of Specimens	6
Clinical Laboratory Tests and the Patient	7
Labeling of Specimens and Laboratory Request Forms	7
Collection, Preparation and Disposition of Specimens	9
Blood	9
Cerebrospinal Fluid	26
Duodenal Contents and Bile	26
Feces	29
Milk	31
Saliva	31
Sputum	32
Stomach Contents	33
Tissue	37
Toxicologic Material	37
Transudate or Exudate	38
Urine	40
Water	45
Preparation of the Patient for Other Tests	46
Mailing Laboratory Specimens	47
Discarding Specimens After Examination	51

XII *Table of Contents*

3. Examination of Urine	53
Microscopic Examination of Urine Sediment	53
Physical Examination of Urine	59
Qualitative Chemical Analyses of Urine	61
Quantitative Chemical Analyses of Urine	78
4. Blood Chemistry	86
Preliminary Steps for Each Analysis	88
Preparation of Serum from Clotted Blood	89
Preparation of Plasma from Blood Containing an Anticoagulant	89
Blood Chemistry Procedures	89
Protein-Free Blood Filtrate (Folin-Wu)	90
Amylase, Serum: Spectrophotometric Method	93
Bilirubin, Serum, Direct and Total: Spectrophotometric Method	98
Calcium, Serum: Spectrophotometric Method	104
Carbon Dioxide Combining Power, Plasma: Gasometric Method	108
Chlorides (Serum, Plasma, Cerebrospinal Fluid, Urine): Titration Method	113
Glucose (Whole Blood, Serum, Plasma, Cerebrospinal Fluid): Spectrophotometric Method	116
Hemoglobin, Whole Blood: Spectrophotometric Method	120
Hydrogen Ion Concentration (pH), Whole Blood: Electrometric Method	123
Icterus Index, Serum: Spectrophotometric Method	124
Iron, Total: Spectrophotometric Method	126
Phosphatase, Alkaline (Serum): Spectrophotometric Method	129
Phosphorus, Inorganic (Serum): Spectrophotometric Method	132
Potassium, Serum: Spectrophotometric Method	135
Proteins (Serum, Total and Albumin): Spectrophotometric Method	141
Sodium, Serum: Spectrophotometric Method	145
Urea (BUN), Serum or Plasma: Spectrophotometric Method	149
Uric Acid, Serum or Plasma: Spectrophotometric Method	152
5. Examination of Stomach Contents	156
Macroscopic Examination	157
Microscopic Examination	157

Table of Contents XIII

Chemical Examination	159
Qualitative Analysis	159
Quantitative Analysis	161
6. Examination of Feces	165
Macroscopic Examination	165
Microscopic Examination	166
Chemical Examination	167
Parasites and Eggs in Feces	169
Characteristics of the Common Intestinal Parasites	173
Definitions of Terms	187
7. Hematologic Procedures	190
Definitions	190
Formed Elements of the Blood	192
Enumeration of Cellular Constituents	199
The Stained Blood Film	208
Determination of Hemoglobin Concentration	212
Miscellaneous Tests	213
8. Serologic Procedures	222
Immunologic Studies	222
Laboratory Procedures	226
Blood Groups	229
9. Examination of Cerebrospinal Fluid	234
Collection	234
Appearance	234
Laboratory Tests	235
10. Microbiologic Procedures	237
Identification of Microorganisms	238
Bacteria	239
Rickettsias	270
Viruses	271
Medical Mycology	272
Supplies and Equipment for the Microbiology Laboratory	275
11. Parasitologic Procedures	282
Intestinal Parasites	282

XIV *Table of Contents*

Parasites Found in the Blood	282
Laboratory Examination of Specimens	283
12. Histologic Procedures	285
Fixation of Tissues	285
Embedding of Tissues	286
Paraffin Sections	286
Frozen Sections	287
Special Sections	288
Suggestions Concerning the Cutting of Sections	288
Microtomes	288
Histologic Reagents	289
13. Physical Procedures	290
Units of Measurement	290
Temperatures and Heat	294
Solutions and Liquids	303
Measurement of Gases	320
Reading of Instruments	325
Analytical Weighing	326
Microscopy	335
The Nature of Light	357
The Spectroscope	360
Colorimetry and Photometry	365
The Polarimeter	397
The Refractometer	404
Radioactivity	407
Measurement of Electric Current	413
Glass, Stopper, and Rubber Tubing Manipulations	419
Sterilization	422
14. Chemical Procedures	429
Analytical Methods	432
Gravimetric Methods	432
Titration Methods (Volumetric Analysis)	438
Photometric (Colorimetric) Methods	467
Gasometric Methods	468

Table of Contents **XV**

Electrometric Methods	469
Physical Methods	470
Automatic Analyzer Methods	473
Accuracy in Chemical Analyses	474
Some Important Rules for Chemical Procedures	477
Discarding Chemicals and Reagents	478
15. Supplies	479
Storerooms	479
Inventory of Supplies	480
Ordering Glassware and Equipment	482
Ordering Chemicals	482
Special Chemicals	484
Labeling of Containers	485
Labeling of Reagents	486
Distilled Water	486
16. Glassware	489
General Considerations	489
Graduated Glassware	496
Calibration of Glassware	508
Special Data Concerning Glassware	509
17. Statistical Methods in the Clinical Laboratory	513
Fundamentals of Statistical Procedures	513
Common Statistical Estimations	521
18. Animals Used in the Clinical Laboratory	524
Housing of Animals	524
Cleaning of Animal Quarters	525
Bedding of Laboratory Animals	525
Feeding of Laboratory Animals	526
Receipt of Animals	526
Breeding of Laboratory Animals	527
Diseases Affecting Laboratory Animals	527
Methods of Bleeding and Inoculating Animals	528
Animal Cages for Transportation	528
Autopsy of Small Animals	528

XVI *Table of Contents*

19. Health, Safety, and First Aid in the Laboratory	530
The Health of Laboratory Workers	530
General Rules of Safety	533
First Aid in the Laboratory	542
Appendixes	555
Appendix A: Conversion Factors	555
Appendix B: Atomic Weights Table	557
Appendix C: Required Equipment	558
Index	563
