

Table of Contents

Preface	xiii
SI Units of Measurement in the Biologic Range	xiv
1. The Microbial World	1
2. Cell Structure	5
Optical Methods 5	Staining 26
Eukaryotic Cell Structure 5	Morphologic Changes During Growth 27
Prokaryotic Cell Structure 6	
3. The Major Groups of Bacteria	29
Principles of Classification 29	Descriptions of the Principal Groups of Bacteria 32
4. Microbial Genetics	36
The Physical Basis of Heredity 36	Transformation 44
The Prokaryotic Chromosome 36	Transduction by Bacteriophage 44
Mutation 39	Plasmid-Mediated Conjugation 46
Intercellular Transfer & Genetic Recombination in Bacteria 43	Genes of Structure & Genes of Regulation 53
Genetics of Drug Resistance 53	
5. Microbial Metabolism	57
The Role of Metabolism in Biosynthesis & Growth 57	The Regulation of Metabolic Pathways 68
Metabolic Pathways Unique to Microorganisms 60	The Regulation of RNA Synthesis 72
Patterns of Microbial Energy-Yielding Metabolism 63	The Regulation of DNA Synthesis & Cell Division 72
6. Cultivation of Microorganisms	74
Nutrition 74	Cultivation Methods 76
Environmental Factors Affecting Growth 75	
7. The Growth & Death of Microorganisms	79
Definition & Measurement of Growth 79	Synchronous Growth 81
Exponential Growth 79	Growth Parameters 81
The Growth Curve 80	Definition & Measurement of Death 82
The Maintenance of Cells in Exponential Phase 81	Antimicrobial Agents 83
8. The Microbiology of Special Environments	88
Water 88	Air 93
Milk 90	Soil 95
Foods 91	
9. Bacteriophage	99
Life Cycles of Phage & Host 99	Replication of RNA Phages 102
Methods of Study 100	Phage Genetics 103
Properties of Phage 100	Lysogeny 104
Phage Reproduction 101	

10. Antimicrobial Chemotherapy	108
Mechanisms of Action of Clinically Used Antimicrobial Drugs 108	
Resistance to Antimicrobial Drugs 111	
Origin of Drug Resistance 111	
Drug Dependence 113	
Antimicrobial Activity in Vitro 113	
Antimicrobial Activity in Vivo 114	
11. Host-Parasite Relationships	134
Infection 134	
Attributes of Microorganisms That Enable Them to Cause Disease 134	
Attributes of the Host That Determine Re- sistance to Microorganisms 136	
12. Immunology: I. Antigens & Antibodies	143
Definitions & Cellular Basis of Immune Responses 143	
Definitions 143	
The Cellular Basis of Immune Responses 143	
Antibodies: Structure & Formation 146	
Structure of Immunoglobulins 146	
Antigen-Antibody Reactions 151	
Serologic Reactions 153	
Precipitation Reactions 154	
Agglutination Reactions 155	
The Antiglobulin (Coombs) Test 155	
Some Mechanisms of Nonspecific Host Resistance 136	
Resistance & Immunity 139	
Natural Immunity 140	
Acquired Immunity 141	
Genetic Influences 141	
13. Immunology: II. Antibody-Mediated & Cell-Mediated (Hypersensitivity & Immunity) Reactions	162
Antibody-Mediated Hypersensitivity 162	
Anaphylaxis 162	
Arthus Reaction 164	
Serum Sickness 164	
Immune Complex Disease 164	
Drug Hypersensitivity 165	
Cell-Mediated Hypersensitivity & Immunity 165	
Tuberculin Hypersensitivity 166	
Passive Transfer of Cell-Mediated Hyper- sensitivity 166	
Induction of Cell-Mediated Hypersensi- tivity 166	
Tests to Evaluate Cell-Mediated Hypersensi- tivity or Immunity 167	
"Allergy of Infection": Cell-Mediated Hypersensi- tivity Employed in Diagnosis of Infection 168	
Relationship of Cell-Mediated Reactions & Immunity & Resistance to Infection 168	
Contact Allergy to Drugs & Simple Chemicals 169	
Role of Lipids, Waxes, & Adjuvants in the Develop- ment of Cell-Mediated Reactions 169	
Extrinsic Allergic Alveolitis (Chronic Recurrent Lung Disease) 169	
Interference With Cell-Mediated or Antibody- Mediated Hypersensitivity or Immunity 169	
Autoimmune Diseases 171	
Transplantation Immunity 172	
Tumor Immunity 174	
14. Pyogenic Cocci	175
The Staphylococci 175	
The Streptococci 179	
The Pneumococci 184	
The Neisseriae 187	
<i>Neisseria meningitidis</i> (Meningococcus) 187	
<i>Neisseria gonorrhoeae</i> (Gonococcus) 189	
Other Neisseriae 190	
15. Gram-Positive Bacilli	191
Aerobic Sporeforming Bacilli 191	
Anthrax 191	
Anaerobic Sporeforming Bacilli 192	
The Clostridia 192	
<i>Clostridium botulinum</i> 193	
<i>Clostridium tetani</i> 194	
The Clostridia of Gas Gangrene 195	
16. Corynebacteria	198

17. Mycobacteria	202
<i>Mycobacterium tuberculosis</i> 202	
Other Mycobacteria 207	
18. Enteric Gram-Negative Microorganisms	209
Endotoxins of Gram-Negative Bacteria 209	
Exotoxins Produced by Aerobic Gram-Negative Bacteria 211	
The Coliform Bacteria 212	
The Proteus Group 214	
19. Small Gram-Negative Rods	223
The Brucellae 223	
The Pasteurellae 225	
The Hemophilic Bacteria 228	
<i>Haemophilus influenzae</i> 228	
<i>Bordetella (Haemophilus) pertussis</i> 230	
Other Organisms of the Haemophilus Group 231	
20. Spirochetes & Other Spiral Microorganisms	233
<i>Treponema pallidum</i> 233	
Diseases Related to Syphilis 235	
Other Spirochetal Organisms 236	
<i>Borrelia recurrentis</i> 236	
<i>Leptospirae</i> 237	
<i>Spirillum minus (Spirillum morsus muris)</i> 239	
Spirochetes of the Normal Mouth & Mucous Membranes 239	
Fusospirochetal Disease 239	
21. Rickettsial Diseases	241
22. Chlamydiae	246
Psittacosis (Ornithosis) 248	
Lymphogranuloma Venereum (LGV) 250	
Trachoma & Inclusion Conjunctivitis (TRIC Agents, <i>Chlamydia trachomatis</i>) 251	
Other Agents of the Group 253	
23. Miscellaneous Pathogenic Microorganisms	254
Mycoplasmas (PPLO) & Wall-Defective Microbial Variants 254	
Legionnaires' Disease (Broad Street Pneumonia) 256	
<i>Streptobacillus moniliformis</i> 257	
<i>Listeria monocytogenes</i> 257	
<i>Erysipelothrix insidiosa (E rhusiopathiae)</i> 257	
<i>Acinetobacter (Mima, Herellea)</i> 258	
<i>Bartonella bacilliformis</i> 258	
Bacteroides 258	
<i>Pseudomonas (Actinobacillus) mallei & Pseudomonas pseudomallei</i> 259	
<i>Aeromonas hydrophila</i> 259	
24. Normal Microbial Flora of the Human Body	260
Role of the Resident Flora 260	
Normal Flora of the Skin 260	
Normal Flora of the Mouth & Upper Respiratory Tract 261	
Normal Flora of the Intestinal Tract 261	
Normal Flora of the Urethra 262	
Normal Flora of the Vagina 262	
Normal Flora of the Eye (Conjunctiva) 262	
25. Medical Mycology	264
Structures of Fungi 264	
Superficial Mycoses 266	
Other Superficial Mycoses 269	
Subcutaneous Mycoses 269	
1. <i>Sporothrix schenckii</i> 269	
2. Chromomycosis 270	
3. Mycetoma 271	
Systemic Mycoses 271	
1. <i>Coccidioides immitis</i> 271	
2. <i>Histoplasma capsulatum</i> 273	
3. <i>Blastomyces dermatitidis</i> 274	
4. <i>Paracoccidioides brasiliensis (Blastomyces brasiliensis)</i> 275	
Opportunistic Mycoses 276	
1. <i>Candida albicans</i> 276	
2. <i>Cryptococcus neoformans</i> 278	
3. Aspergillosis 279	
4. Zygomycosis (Mucormycosis, Phycomycosis) 279	
Actinomycetes 279	
1. <i>Actinomyces israelii</i> 280	
2. <i>Nocardia asteroides</i> & Related Species 281	
Hypersensitivity to Fungi 282	
Mycotoxins 282	

26. Principles of Diagnostic Medical Microbiology	283
Communication Between Physician & Laboratory 283	
Specimens 283	
Selection of Laboratory Investigations 284	
The Demonstration of an Infectious Agent 284	
Anaerobic Infections 290	
Serologic Tests & the Demonstration of Specific Antibody 291	
Skin Tests 293	
Nonspecific Clinical Laboratory Tests 295	
Laboratory Aids in the Selection of Antimicrobial Therapy 298	
Gram & Acid-Fast Staining Methods 299	
✓27. General Properties of Viruses	300
(A detailed Table of Contents of this chapter is presented on p 300.)	
28. Isolation of Viruses From Clinical Specimens	336
Considerations in the Diagnosis of Viral Diseases 336	
Direct Examination of Clinical Material 337	
Virus Isolation Technic 337	
Specimens for Study 337	
Preservation of Viruses 338	
Preparation of Inocula 338	
Animal Inoculation 338	
Cultivation in Cell Culture 340	
Embryonated Eggs 341	
Examination of Embryos 341	
29. Serologic Diagnosis & Immunologic Detection of Virus Infections	343
Neutralization (Nt) Tests 344	
Quantitative Neutralization Tests 344	
The Neutralization Test in Cell Culture 346	
Neutralization Tests in Eggs 346	
Complement Fixation (CF) Tests 347	
Soluble & Viral Antigens 347	
Hemagglutination Inhibition (HI) Tests 347	
Standards & Titration 348	
The Diagnostic Agglutination Inhibition Test 348	
Passive Hemagglutination Test 349	
Other Tests 349	
Mixed Hemadsorption Test 349	
Immunofluorescence Test 350	
Immunodiffusion Test 350	
Counterimmunoelctrophoresis Test 350	
Radioimmunoassay Method 351	
Immune Electron Microscopy 352	
Diagnosis of Infectious Mononucleosis 352	
Heterophil Agglutination Test 353	
Mononucleosis Spot Test 353	
Tests for Dermal Hypersensitivity (Skin Tests) 353	
30. Arthropod-Borne (Arbo) Viral Diseases	358
Togavirus Encephalitis (SLE, EEE, WEE) 360	
Venezuelan Equine Encephalitis 364	
Bunyavirus Encephalitis (California Encephalitis) 365	
West Nile Fever 365	
Yellow Fever 366	
Dengue (Breakbone Fever) 368	
Hemorrhagic Fever 369	
Lassa Fever 370	
Sandfly Fever (Pappataci Fever, Phlebotomus Fever) 371	
Colorado Tick Fever (Mountain Fever, Tick Fever) 371	
Rift Valley Fever (Enzootic Hepatitis) 372	
31. Picornavirus Family (Enterovirus & Rhinovirus Groups)	373
Enterovirus Group 373	
Poliomylitis 373	
Coxsackieviruses 378	
Echoviruses 381	
New Enterovirus Types 382	
Rhinovirus Group 382	
Foot-and-Mouth Disease (Aphthovirus of Cattle) 383	
32. Hepatitis Viruses	385
33. Rabies & Other Viral Diseases of the Nervous System; Slow Viruses	397
Rabies 397	
Aseptic Meningitis 402	
Lymphocytic Choriomeningitis 402	
Encephalitis Lethargica (von Economo's Disease) 403	
Epidemic Neuromyasthenia (Benign Myalgic Encephalitis) 403	
Encephalomyocarditis Virus Infection (Mengo Fever) 403	
Slow Virus Diseases: Chronic Viral Diseases of the CNS & Other Progressive Degenerative Disorders 403	

34. Orthomyxovirus (Influenza) & Coronavirus Families	408
Orthomyxovirus Family 408	Coronavirus Family 415
Influenza 408	
35. Paramyxovirus Family & Rubella Virus	418
Mumps (Epidemic Parotitis) 419	Rubella (German Measles) 425
Parainfluenza Virus Infections 420	1. Postnatal Rubella 425
Newcastle Disease Conjunctivitis 421	2. Congenital Rubella Syndrome 425
Measles (Rubeola) 422	3. Control of Rubella 427
Respiratory Syncytial (RS) Virus 424	
36. Poxvirus Family	429
Smallpox & Related Viral Infections of Humans 429	Monkeypox 437
Variola & Vaccinia 429	Yaba Monkey Virus 437
Cowpox 437	Molluscum Contagiosum 437
37. Adenovirus Family	439
38. Herpesvirus Family	445
Herpes Simplex (Herpes Labialis, Herpes Genitalis, & Many Other Syndromes) 445	EB Herpesvirus (Infectious Mononucleosis, Burkitt's Lymphoma, Nasopharyngeal Carcinoma) 453
Varicella-Zoster Virus 449	B Virus (Herpesvirus of Old World Monkeys) 454
Varicella (Chickenpox) & Zoster (Herpes Zoster, Shingles, Zona) 449	Marmoset Herpesvirus (Herpesvirus of New World Monkeys) 455
Cytomegalovirus (Cytomegalic Inclusion Disease, Salivary Gland Virus Disease) 451	
39. Reoviruses, Rotaviruses, & Other Human Viral Infections	456
Reoviridae 456	Exanthem Subitum (Roseola Infantum) 459
Reoviruses 456	Fifth Disease (Erythema Infectiosum) 459
Orbiviruses 457	Marburg (Green Monkey) Virus Disease (African Hemorrhagic Fever) 460
Rotaviruses (Infantile Gastroenteritis) 457	Cat Scratch Fever (Benign Lymphoreticulosis) 460
Epidemic Gastroenteritis Virus 458	Guillain-Barré Syndrome (Inflammatory Polyradiculopathy) 460
Crohn's Disease, Ulcerative Colitis, & Other Chronic Diseases of the Gastrointestinal Tract 458	Diabetes Mellitus 461
Warts (Verrucae, Human Papovavirus) 459	
40. Oncogenic Viruses	462
(A detailed Table of Contents of this chapter is presented on p 462.)	
41. Medical Parasitology	493
<i>Fred L. Dunn & Donald Heyneman</i>	
Classification 493	The Plasmodia 504
<i>Giardia lamblia</i> 494	<i>Isospora</i> 507
<i>Trichomonas</i> 495	<i>Sarcocystis lindemanni</i> 508
Other Intestinal Flagellates 496	<i>Toxoplasma gondii</i> 508
The Hemoflagellates 496	<i>Balantidium coli</i> 509
1. <i>Leishmania</i> 496	<i>Pneumocystis carinii</i> 510
2. <i>Trypanosoma</i> 498	Helminths: Ova in Feces & Microfilariae in Blood & Tissues 511
<i>Entamoeba histolytica</i> 500	Illustrations 515-525
Other Intestinal Amebas 502	
Index	527
