

CONTENTS

I	Normal Values and Methods for Measuring Cardiac Output	
	<i>Chapter 1</i>	
	Normal Cardiac Output and Its Variations	3
	<i>Chapter 2</i>	
	Measurement of Cardiac Output by the Direct Fick Method	21
	<i>Chapter 3</i>	
	Indicator-Dilution Methods for Determining Cardiac Output	40
	<i>Chapter 4</i>	
	The Indirect Fick and the Foreign Gas Methods for Estimating Cardiac Output	71
	<i>Chapter 5</i>	
	Indirect Estimation of Cardiac Output by Physical Methods: The Pulse Contour, Ballistocardiographic, and Roentgenographic Methods	83
	<i>Chapter 6</i>	
	Direct Recording of Cardiac Output Using Flowmeters	103

II Regulation of Cardiac Pumping Action

Chapter 7

Introduction to the Regulation of Cardiac Output 127

Chapter 8

The Pumping Ability of the Heart as Expressed by
Cardiac Function Curves 140

Chapter 9

Patterns of Cardiac Output Curves 151

III Regulation of Venous Return

Chapter 10

Peripheral Vascular Contribution to Cardiac Output
Regulation—The Concept of “Venous Return” 163

Chapter 11

Effect of Right Atrial Pressure on Venous Return—
The Normal Venous Return Curve 177

Chapter 12

Mean Circulatory Pressure, Mean Systemic Pressure,
and Mean Pulmonary Pressure and Their Effect on
Venous Return 193

Chapter 13

Effect of Peripheral Resistance and Capacitance on
Venous Return 209

IV Graphical and Algebraic Analyses of Cardiac Output Regulation

Chapter 14

Simplified Graphical Analysis of Cardiac Output Regu-
lation 223

<i>Chapter 15</i>	
A More Complex Graphical Analysis of Cardiac Output Regulation	235
<i>Chapter 16</i>	
Simplified Algebraic Analyses of Cardiac Output	257
<i>Chapter 17</i>	
Complex Algebraic Analysis of Cardiac Output	267

V Regulation of Cardiac Output in Specific Physiological and Pathological States

<i>Chapter 18</i>	
Autonomic Regulation of Cardiac Output	287
<i>Chapter 19</i>	
Effect of Tissue Oxygen Need on Cardiac Output....	301
<i>Chapter 20</i>	
Effect of Blood Volume Changes and Orthostatic Factors on Cardiac Output	315
<i>Chapter 21</i>	
Cardiac Output in Circulatory Shock	333
<i>Chapter 22</i>	
Effects on Cardiac Output of Alterations in Peripheral Resistance—Especially the Effects of Anemia and Polycythemia	352
<i>Chapter 23</i>	
Effect of A-V Fistulas and Cardiac Shunts on Cardiac Output	366
<i>Chapter 24</i>	
Effect on Cardiac Output of Respiration, Opening the Chest, and Cardiac Tamponade	378
<i>Chapter 25</i>	
The Cardiac Output in Muscular Exercise	387

<i>Chapter 26</i>	
Cardiac Output in Heart Failure:	
I. Bilateral Failure	398
 <i>Chapter 27</i>	
Cardiac Output in Heart Failure:	
II. High Output Failure, Participation of the Pulmonary Circulation in Failure, and Effect of Exercise in Failure	413
 <i>Chapter 28</i>	
Epilogue	424
 Bibliography	 429
 Index	 461
