## VOLUME ONE

### PART I HISTORY

#### 1 History of Alimentary Tract Radiology, 1

H. Joachim Burhenne and Alexander R. Margulis

Gastrointestinal tract, 1

Upper GI study, 2

Small bowel, 8

Colon, 8

Gallbladder and biliary system, 10

Cholecystography, 11

Cholangiography, 13

Scintigraphy, 13

Liver, spleen, and pancreas, 13

Cross-sectional imaging, 16

Ultrasound, 16

Computed tomography, 17

Magnetic resonance, 19

Intervention, 23

### PART II ANATOMY AND PHYSIOLOGY

#### 2 Anatomy, 28

Elias Kazam, William A. Rubenstein, John A. Markisz,  
Joseph P. Whalen, and Kenneth Zirinsky

Diaphragm, 32

Liver, 32

Hepatic veins, 33

Portal veins, 33

Portacaval space, 34

Gallbladder, 34

Spleen, 34

Stomach, 34

Duodenum, 35

Colon, 35

Intraperitoneal compartments, 35

Pancreas, 47

Adrenal glands, 61

Kidneys, 61

Retroperitoneal compartments, 63

Abdominal great vessels, 65

#### 3 Gastrointestinal Physiology, 67

F.P. McGrath and Giles W. Stevenson

Enteric neuropeptides and enteric hormones, 67

Anatomy of the gut-endocrine system, 67

Gastrin, 67

Cholecystokinin, 69

Secretion, 69

Insulin, 69

Glucagon, 69

Vasoactive intestinal polypeptide, 69

Somatostatin, 69

Distal intestinal peptides, 69

Clinical implication of gut peptides, 69

Prostaglandins and the gut, 72

Proton pump inhibitors, 72

Oropharynx and swallowing, 73

Esophagus, transit, and acid neutralization, 73

Physiology of the stomach, 75

Gastric secretion, 75

Gastric motility, 77

Duodenum and small intestine, 79

Digestion and absorption, 79

Malabsorption, 80

Motility, 81

Immunology, 82

Biliary system and liver, 83

Anatomy and function, 83

Synthesis, 84

Secretion, 84

Bile flow, 86

Physiology of ascites, 87

Pancreas, 87

Endocrine pancreas, 87

Exocrine pancreas, 87

Pancreatic cell function tests, 88

Pancreatic digestion tests, 88

Colon, 88

Transit, 88

Assessment of colonic function, 88

Absorption, 89

Diarrhea, 89

Physiology of bowel preparation, 90

Defecation, 91

### PART III PHARYNX

#### 4 Normal Anatomy and Techniques of Examination of the Pharynx, 94

Emmett T. Cunningham, Jr., Bronwyn Jones, and  
Martin W. Donner

General indications, 94

Pharyngeal anatomy, 94

Normal pharyngeal swallow, 98

Neural control of the pharyngeal phase, 98

Techniques of examination, 101

Choice of studies, 101

Plain radiography, 101

Barium studies, 101

Axial studies, 106

Future directions in imaging, 112

#### 5 Benign Structural Diseases of the Pharynx, 114

Olle Ekberg

Benign neoplasms, 114

Mucosal abnormalities, 114

Foreign bodies, 114  
 Trauma, 115  
 Lateral pharyngeal outpouchings, 115  
 The pharyngoesophageal segment, 118  
   Zenker's diverticulum, 118  
 Killian-Jamieson's diverticulum, 118  
   Webs, 118  
 Branchial cleft anomalies, 120  
 Enlarged tonsils, 120  
 Parapharyngeal abnormalities, 120  
   Thyroid gland, 120  
   Laryngoceles, 120  
   Cervical spine osteophytes, spurs, and kyphosis, 120  
   Parapharyngeal abscesses, 120  
   Tortuous vessels, 120  
   Retropharyngeal tendinitis, 126  
   Thyroglossal cysts, 126  
   Calcified lymph nodes, 126  
   Parapharyngeal neoplasms, 126

## 6 Functional Abnormalities of the Pharynx, 127

Olle Ekberg

Oral stage, 127  
 Pharyngeal stage, 129  
   Hyoid bone, 129  
   Epiglottis, 129  
   Laryngeal vestibule, 130  
   Pharyngeal constrictors, 130  
 PE segment dysfunction, 133  
 Cause of dysfunction, 133  
 Adaptation, compensation, and decompensation, 135  
 Treatment planning, 137

## 7 Malignant Diseases of the Pharynx, 139

Hugh D. Curtin and Thomas A. Kim

Pathology, 139  
   Squamous cell carcinoma, 139  
   Minor salivary gland tumors, 139  
   Lymphoma, 139  
   Other, 139  
 Staging, 139  
   Imaging, 140  
   Tumor spread, 142  
 Specific anatomic locations, 144  
   Oral cavity, 144  
   Oropharynx, 150  
   Hypopharynx, 157  
   Nasopharynx, 160  
 Reconstruction and postoperative evaluation, 160  
 Summary, 163

## 8 A Multidisciplinary Approach to the Patient with Swallowing Impairment, 165

Bronwyn Jones and Martin W. Donner

## PART IV ESOPHAGUS

### 9 Normal Anatomy and Techniques of Examination of the Esophagus: Fluoroscopy, CT, MRI, and Scintigraphy, 168

Olle Ekberg

Normal anatomy, 168  
 General radiographic anatomy of the esophagus, 168

Aspects of cross-sectional anatomy, 173  
 Technique of examination, 176  
 Fluoroscopic evaluation, 176  
 Cross-sectional techniques, 184  
 Other techniques, 184

### 10 Normal Anatomy and Techniques of Examination of the Esophagus: Endosonography, 186

Jose F. Botet and Charles J. Lightdale

Fundamentals of intraluminal sonography, 186  
 Evaluation of the gastrointestinal wall, 186  
   Ultrasound, 186  
   Tissues, 186  
   Absorption and scattering, 187  
   Frequency and penetration, 187  
   Focal zone, 187  
   Axial resolution, 187  
 The gastrointestinal wall, 187  
 The esophagus, 187  
   Normal anatomy, 187  
   Examination technique, 190

### 11 Radiology of the Esophagus, 192

Edward T. Stewart and Wylie J. Dodds

Types of examination, 192  
 Performance of examination, 192  
 Normal esophageal anatomy, 193  
   Resting conditions, 194  
   Peristaltic contractions, 194  
   Nonperistaltic contractions, 196  
   Radiographic evaluation, 196  
 Esophageal motility disorders, 198  
   Radiographic and manometric features, 198  
   Primary motility disorders, 202  
   Secondary motility disorders, 206  
   Differential diagnosis, 210  
 Congenital anomalies, 212  
   Atresia and tracheoesophageal fistula, 212  
   Duplication, 212  
   Miscellaneous anomalies, 212  
 Esophageal diverticula, 214  
   Intramural pseudodiverticulosis, 216  
 Traumatic lesions, 216  
   Foreign bodies, 216  
   Esophageal perforation, 216  
   Miscellaneous lesions, 218  
 Hiatus hernia, 218  
 Esophagitis, 220  
   Gastroesophageal reflux disease, 220  
   Barrett's esophagus, 224  
   Infectious esophagitis, 226  
   Caustic esophagitis, 229  
   Drug-induced esophagitis, 230  
   Radiation esophagitis, 232  
   Miscellaneous causes, 232  
 Rings, webs, and strictures, 233  
   Esophageal rings, 233  
   Esophageal webs, 235  
   Esophageal strictures, 236  
 Esophageal varices, 238  
 Esophageal tumors, 242  
   Malignant tumors, 242  
   Metastases, 249  
   Benign tumors, 250

- Indentations and displacement, 252
  - Indentations, 252
  - Deviation, 254
- Diaphragm, 255
  - Anatomy, 255
  - Defects, 255
  - Movement and location, 256
  - Neoplasms, 256

## 12 Endosonography of the Esophagus, 264

T.L. Tio

- Instrumentation, 264
- Technique, 264
- Image interpretation, 265
- Staging of cancer, 265
- Assessment of recurrence, 269
- Submucosal lesion assessment, 269
  - Leiomyoma versus leiomyosarcoma, leiomyoblastoma, and other nonepithelial malignancies, 269
- Evaluation of the mediastinum, 270
- Conclusions, 270

## 13 CT and MR Staging of Tumors of the Esophagus and Gastroesophageal Junction and Detection of Postoperative Recurrence, 272

Leslie E. Quint, Isaac R. Francis, Gary M. Glazer, and Mark B. Orringer

- Computed tomography, 272
  - Normal esophagus, 272
  - Esophageal carcinoma, 272
  - CT staging of esophageal carcinoma, 273
  - Recurrent tumor, 278
- Magnetic resonance imaging, 278

## PART V STOMACH AND DUODENUM

### 14 Normal Anatomy and Techniques of Examination of the Stomach and Duodenum, 282

K.M. Harris, G.M. Roberts, and B.W. Lawrie

- Radiologic anatomy of the stomach and duodenum, 282
  - Stomach, 282
- Normal anatomic variants and indentations that may simulate disease, 285
  - Stomach, 285
  - Duodenum, 285
- Barium meal technique, 286
  - Historical perspective, 286
  - Indications, 286
  - Contraindications, 286
  - Patient preparation, 286
  - Contrast media, 287
  - Paralysis of peristalsis, 288
  - Gas-producing agents, 288
  - Techniques, 289
  - Techniques for the examination of the duodenum, 296
  - Hypotonic duodenography, 296
- Modified barium meal techniques for specific clinical situations, 297
  - Suspected gastroduodenal perforation, 297
  - Studies of the postoperative stomach and duodenum, 297
- Upper gastrointestinal bleeding, 298

- The roles of barium studies and endoscopy in the investigation of the stomach and duodenum, 298
  - Clinical diagnosis, 299
  - Patient preference, 300
  - Safety, 300
    - Availability and cost, 300
- Upper gastrointestinal endoscopy, 301
  - Basic technique, 301
  - Patient preparation, 301
  - Sedation, 302
  - Intubation, 302
  - Normal appearances, 304
    - Aftercare, 304
  - Alternative imaging modalities, 305
  - Computed tomography, 305
    - Technique, 305
  - Normal CT anatomy, 306
  - Magnetic resonance imaging, 307

### 15 Endosonography: Normal Anatomy and Techniques of Examination of the Stomach and Duodenum, 311

Jose F. Botet and Charles J. Lightdale

- The stomach, 311
  - Normal anatomy, 311
  - Examination technique, 314
- The duodenum, 314
  - Normal anatomy, 314
  - Examination technique, 316

### 16 Nonneoplastic Diseases of the Stomach, 318

Charles A. Rohrmann, Jr., and Sidney W. Nelson

- Congenital lesions, 318
  - Gastric duplication, 318
  - Gastric diverticulum, 318
  - Adenomyosis, 318
  - Ectopic pancreas, 318
  - Antral diaphragm or web, 320
  - Adult pyloric hypertrophy, 322
- Inflammatory diseases, 325
  - Radiographic signs of gastritis, 327
  - Erosive gastritis, 329
  - Hemorrhagic gastritis, 330
  - Chronic gastritis, 330
  - Atrophic gastritis, 330
  - Granulomatous gastritis, 330
  - Syphilis, 331
  - Crohn's disease, 333
  - Gastric sarcoidosis, 333
  - Infective gastritis, 333
- Peptic ulcer disease, 336
  - Epidemiology, 336
  - Definitions and location, 336
  - Ulcer healing, 347
  - Complications, 347
- Hypertrophic gastropathy, 347
  - Hyperrugosity, 351
  - Zollinger-Ellison syndrome, 351
  - Pseudolymphoma, 354
  - Injury gastropathy, 357
  - Corrosive gastropathy, 357
  - Gastric radiation injury, 359
- Miscellaneous gastropathies, 359
  - Eosinophilic gastropathy, 359
  - Amyloidosis, 360

- Abnormalities of function, 361  
 Varices, 365  
 Gastric rupture, 369
- 17 Benign Tumors of the Stomach, 373**  
**E. Maureen White**  
 Radiologic evaluation of benign gastric tumors and polyps, 373  
 Benign epithelial polyps and tumors, 373  
 Hyperplastic (regenerative) polyps, 374  
 Gastric adenomas, 374  
 Hamartomatous polyps, 375  
 Retention polyps (Cronkhite-Canada syndrome), 376  
 Heterotopic polyps (ectopic pancreas, adenomyomas, Brunner's gland hyperplasia), 377  
 Teratoma, 377  
 Benign nonepithelial tumors, 377  
 Smooth muscle tumors (spindle cell leiomyoma, epithelioid variant), 377  
 Neurogenic tumors (schwannoma, neurofibroma, paraganglioma, ganglioneuroma), 379  
 Lipoma, 381  
 Inflammatory fibroid polyp, 381  
 Glomus tumor, 383  
 Vascular tumors (hemangioma, lymphangioma, hemangiopericytoma, hemangioendothelioma), 383  
 Carcinoid tumor (benign form), 384  
 Granular cell tumor (myoblastoma), 384  
 Lymphoid hyperplasia (pseudolymphoma), 384  
 Plasmacytoma, 384
- 18 Diagnosis of Gastric Cancer in Europe, 387**  
**J. Odo Op Den Orth**  
 Barium examination, 387  
 State-of-the-art-technique, 387  
 Limitations of barium examination, 387  
 Cross-sectional techniques, 389  
 Transabdominal gastric ultrasound, 389  
 Diagnostic value of barium examination versus endoscopy, 392  
 Diagnosis of early and advanced gastric carcinoma, 394  
 Current role of radiology, 394  
 Macroscopic types of gastric carcinoma, 394  
 Protruded type, 394  
 Superficial type, 395  
 Excavated lesions, 395  
 Linitis plastica, 395  
 Experience in a Dutch general hospital, 397
- 19 Diagnosis of Gastric Cancer in Japan, 399**  
**Maskazu Maruyama and Tsutomu Hamada**  
 Japanese approach to the radiographic examination of the stomach, 399  
 Basic approach, 399  
 Technical considerations in the initial (routine) study, 400  
 Difference in image quality of the initial and detailed studies, 401  
 Diagnosis of gastric cancer, 402  
 General considerations, 402  
 Application of computed radiography to the double-contrast examination, 402  
 Role of endoscopic ultrasonography, 404  
 Definition and classification of early gastric cancer, 404  
 Radiographic diagnosis of early gastric cancer and correlation with endoscopy, 405  
 Diagnosis of early polypoid cancer, 406  
 General considerations, 406  
 Gross appearance of polypoid lesions, 406  
 Adenoma, 406  
 Types I and IIa, 407  
 Types IIa + IIc and IIc + IIa, 407  
 Radiographic diagnosis of early depressed cancer, 410  
 General considerations, 410  
 Correlation of histologic type and depressed early cancer, 410  
 Types IIc, IIc + III, and III, 412  
 Early cancer smaller than 1 cm, 413  
 Type IIb-like lesion, 414  
 Superficial spreading carcinoma, 415  
 Radiographic diagnosis of advanced cancer, 416  
 General considerations, 416  
 Classification, 416  
 Bormann types 1 and 2, 416  
 Bormann type 3, 416  
 Bormann type 4, 419  
 Linitis plastica—type of carcinoma and its early phase, 420  
 Advanced cancer simulating type IIc, 421  
 Esophageal invasion of gastric cancer, 422  
 Carcinoma of the gastric stump after gastrectomy, 423  
 General considerations, 423  
 Carcinoma of the gastric stump after gastrectomy for benign lesions, 423  
 Residual and recurrent cancer of the gastric stump, 423  
 Multiple cancers, 424  
 Evaluation of a mass screening program for stomach cancer, 424  
 Value of mass screening, 424  
 Method of mass screening, 425  
 Cost-effectiveness analysis, 427
- 20 Malignant Tumors of the Stomach, 429**  
**Henry I. Goldberg**  
 Lymphoma, 429  
 Gross and histologic appearance, 429  
 Radiographic findings—upper GI barium examination, 429  
 Ultrasound findings, 429  
 CT findings, 429  
 Leiomyosarcoma, 432  
 Radiographic features, 432  
 Ultrasound features, 433  
 CT features, 433  
 Metastases, 433  
 Carcinoid tumors, 434  
 Kaposi's sarcoma, 435  
 Villous adenoma, 435  
 Gastric involvement by leukemia, 435
- 21 CT and MR Staging of Gastric Carcinoma, 437**  
**Robert A. Halvorsen**  
 Pathology, 437  
 Anatomic considerations, 438  
 Staging, 438  
 Staging systems, 439  
 Primary site (T), 439

- Regional lymph nodes (N), 440
  - Distant metastases (M), 441
  - Stage grouping, 441
  - Histopathologic staging, 441
  - Computed tomographic staging of gastric carcinoma, 441
  - Adenopathy, 442
  - Pancreatic invasion, 443
  - TNM staging, 443
  - Magnetic resonance imaging of the stomach, 445
  - Conclusion, 446
    - Role of CT, 446
    - Role of MRI, 446
- 22 Endoscopic Ultrasound of the Stomach, 448**  
**Jose F. Botet**
- Benign processes, 448
    - Inflammatory processes, 448
    - Large gastric folds, 449
    - Submucosal tumors, 449
    - Polyps, 451
  - Malignant tumors, 451
    - Gastric cancer, 451
    - Gastric lymphoma, 453
    - Others, 453
    - Anastomotic recurrences, 453
  - Summary, 454
- 23 Radiology of the Stomach after Gastric Surgery for Obesity, 455**  
**Claire Smith**
- General overview, 455
  - Gastric bypass, 455
  - Gastroplasty, 458
  - Weight control, 458
  - Radiologic studies, 458
  - Immediate complications, 459
    - Anastomotic leak and abscess, 459
    - Pouch perforation, 460
    - Staple line dehiscence, 460
    - Channel obstruction, 461
  - Delayed complications, 461
    - General principles, 461
    - Pouch dilatation, 463
    - Staple line dehiscence, 464
    - Channel widening, 464
    - Channel stenosis and obstruction, 464
    - Ulceration, 464
  - Summary, 464
- 24 Radiology of Benign and Malignant Diseases of the Duodenum, 467**  
**Jacques W.A.J. Reeders and G. Rosenbusch**
- Congenital and miscellaneous abnormalities, 467
    - Congenital positional anomalies, 467
    - Congenital diaphragm of the duodenum, 467
    - Ladd's band, 467
    - Annular pancreas, 467
    - Duodenal diverticulum, 468
    - Intraluminal diverticulum, 469
    - Wall cysts of the duodenum, 471
    - Antral mucosal prolapse, 472

- PART VI SMALL BOWEL**
- 25 The Small Bowel: Anatomy and Nontube Examinations, 512**  
**Sat Somers and Giles W. Stevenson**
- Anatomy, 512
  - Examination techniques, 514
    - Barium examination, 514
    - Summary: nontube barium examinations, 525
    - Ultrasound examination, 526
    - CT examination, 527
    - MRI examination, 530
- 26 Biphase Enteroclysis with Methylcellulose, 533**  
**Dean D.T. Maglinte**
- Methylcellulose for double-contrast small bowel radiography, 534
  - Patient preparation, 534
  - Contrast materials, 534
  - Fluoroscopy and filming sequence, 534
  - Infusion rates, 535
  - Technique-related problems: avoidance and solution, 539

- Modifications of the technique, 542  
 Biphasic enteroclysis for evaluation of unexplained gastrointestinal bleeding, 545  
 Advantages, 546  
 Complications, 546
- 27 Double-Contrast Enteroclysis with Air, 548**  
**Tsuneyoshi Yao**  
 Technique, 548  
 Patient preparation, 548  
 Barium, 548  
 Radiography, 548  
 Problems, 550
- 28 Percutaneous Fine-Needle Aspiration, Cytology, and Peroral Biopsy of the Small Bowel, 552**  
**Sigmund Dawiskiba, Anders Lunderquist, and Roger Willén**  
 Peroral biopsy, 552  
 Cytologic aspiration technique, 555  
 Complications of fine-needle aspiration cytology, 562
- 29 Idiopathic Inflammatory Disease of the Large and Small Bowel, 564**  
**Ruedi F. Thoeni**  
 Techniques and indications for fluoroscopic examinations  
 in large and small bowel, 564  
 Plain films of the abdomen, 564  
 Barium examinations, 565  
 Indications for barium examinations, 567  
 Pathology, 568  
 Ulcerative colitis, 573  
 Clinical features, 573  
 Endoscopic findings, 574  
 Extraintestinal manifestations, 574  
 Radiographic features, 575  
 Accuracy of radiographic examination, 580  
 Complications, 581  
 Surgical procedures, 584  
 Crohn's disease, 585  
 Clinical features, 585  
 Endoscopic findings, 587  
 Extraintestinal manifestations, 588  
 Radiographic features, 589  
 Differential diagnosis of ulcerative colitis and Crohn's disease, 603  
 Role of colonoscopy, 608  
 Role of radiologic follow-up examinations in evaluation of therapy, 609  
 Scintigraphy for inflammatory bowel disease, 609  
 Computed tomography for inflammatory disease of the colon, 610  
 Sonography for inflammatory bowel disease, 615  
 Magnetic resonance imaging for inflammatory bowel disease, 616
- 30 Small Bowel Neoplasms, 627**  
**Robert E. Koehler**  
 Radiographic detection, 627  
 Barium studies, 627  
 Computed tomography, 627  
 Benign tumors, 627  
 Leiomyomas, 627  
 Lipomas, 628
- Adenomas, 629  
 Hemangiomas, 629  
 Uncommon tumors, 630  
 Polyposis syndromes, 631  
 Peutz-Jeghers syndrome, 631  
 Cronkhite-Canada syndrome, 632  
 Syndromes rarely affecting the small bowel, 632  
 Carcinoid tumors, 632  
 Clinical features, 632  
 Carcinoid syndrome, 632  
 Radiographic features, 633  
 Lymphomas, 634  
 Clinical features, 634  
 Associated conditions, 635  
 Radiographic features, 635  
 Lymphoma variants, 639  
 Differential diagnosis, 639  
 Adenocarcinomas, 639  
 Clinical features, 639  
 Radiographic features, 640  
 Associated conditions, 640  
 Sarcomas, 640  
 Metastatic tumors, 643  
 General features, 643  
 Metastatic melanoma, 643  
 Metastatic carcinoma, 645  
 Kaposi's sarcoma, 645  
 Germ cell tumors, 645
- 31 Vascular Disorders of the Small Intestine, 649**  
**Daniel J. Nolan**  
 Mesenteric ischemia and infarction, 649  
 Ischemic intestinal strictures, 650  
 Intramural hemorrhage, 650  
 Chronic radiation enteritis, 651  
 Systemic sclerosis, 653  
 Vasculitis, 653  
 Henoch-Schönlein purpura, 653  
 Polyarteritis nodosa, 653

### 33 Small Bowel Examination: Overview, 689

John R. Amberg

- Small bowel follow-through method, 689
- Enteroclysis with methylcellulose, 689
- Enteroclysis with air contrast, 690
- General discussion, 691

## PART VII COLON

### 34 Normal Anatomy and Techniques of Examination of the Colon: Barium, CT, and MRI, 692

Giles W. Stevenson

- Anatomy, 692
- Techniques of examination, 696
  - Endoscopy of the colon, 715
  - Integration of endoscopy and radiology, 716
  - Magnetic resonance scanning, 719
  - Functional metabolic imaging of the colon, 720

### 35 Normal Anatomy and Techniques of Examination of the Colon and Rectum: Endosonography, 725

Jose F. Botet and Charles J. Lightdale

- Colon, 725
  - Normal anatomy, 725
  - Examination technique, 726
- Rectum, 727
  - Normal anatomy, 727
  - Examination technique, 729

### 36 Diverticular Disease of the Colon: Conventional Radiology, 730

Pierre Schnyder and Bertrand DuVoisin

- Method of examination, 730
- Incidence, 731
- Pathogenesis, 732
  - Diverticula, 733
- Significance and radiology of a muscular abnormality, 737
- Diverticulitis, 739
  - Deformed sacs, 739
  - Demonstration of abscess, 739
  - Extravasation of contrast material, 739
  - Accuracy of diagnosis, 741
- Differential diagnosis, 742
  - Carcinoma, 742
  - Polyyps, 742
  - Other causes of extrinsic-pressure defects, 743
  - Ischemic colitis, 744
- Complications, 744
  - Obstructions, 744
  - Bleeding, 745
  - Spread of inflammation and fistula formation, 745
- Diseases coexisting with diverticula, 745
  - Diverticular disease with neoplasm, 745
  - Diverticular disease with Crohn's disease, 747
  - Diverticular disease with ulcerative colitis, 747
  - Diverticular disease with angiodysplasia, 747
- Classification, 747
  - Scattered diverticula, 747
  - Diverticulosis, 747
  - Diverticular disease without diverticula, 747
  - Diverticular disease, 747
  - Diverticulitis, 747

### 37 Cross-Sectional Imaging in the Evaluation of Acute Diverticulitis, 750

Mark E. Baker

- Pathophysiology, 750
- Clinical presentation, 750
- Treatment, 751
- Computed tomography, 753
  - Technique, 753
  - CT diagnosis of acute diverticulitis and differential diagnosis, 754

CT versus the contrast enema study, 757  
 Right-sided diverticulitis, 759  
 Sonography in the diagnosis of acute diverticulitis, 760

### 38 Neoplastic Colonic Lesions, 762

Edward T. Stewart and Wylie J. Dodds

Definitions, 762  
 Classification, 762  
 Pathology, 762  
   Histology, 762  
   Morphology, 763  
   Distribution, 763  
   Cancer origin, 764  
 High-risk groups, 765  
 Clinical symptoms, 765  
 Detection, 765  
   Contrast enema, 765  
   Colonoscopy, 767  
   Confidence level, 770  
 Radiologic features, 771  
   Differentiation from artifacts, 771  
   Morphologic findings, 772  
   Potential for malignancy, 774  
 Specific polypoid lesions, 777  
   Adenomas, 777  
   Lipomas, 777  
   Juvenile polyps, 778  
   Carcinoid tumors, 778  
   Endometriosis, 778  
   Other tumors, 779  
 Management, 779  
   Treatment, 779  
   Surveillance, 779  
 Polyposis syndromes, 779  
   Familial multiple polyposis, 780  
   Gardner's syndrome, 781  
   Peutz-Jeghers syndrome, 783  
   Ruvalcaba-Myhre-Smith syndrome, 785  
   Turcot syndrome, 786  
   Muir-Torre syndrome, 786  
   Cowden's disease: multiple hamartoma syndrome, 786  
   Cronkhite-Canada syndrome, 787  
   Juvenile polyposis, 787  
 Hereditary nonpolyposis colorectal carcinoma, 788  
 Differential diagnosis, 790  
 Malignancies of the colon, 790  
   Complications of carcinoma of the colon, 793  
   Caveats pertaining to radiologic examination of carcinoma of the colon, 795

### 39 Computed Tomography and Magnetic Resonance Imaging in Colorectal Carcinoma: Staging and Detection of Postoperative Recurrence, 801

Alex J. Megibow

Goals of imaging studies, 801  
 Computed tomography, 801  
   Techniques, 801  
   Appearance of primary colorectal carcinoma, 803  
   Lymph node metastases, 803  
   Distant metastases, 804  
   Accuracy of CT staging, 805  
   Complications of colorectal cancer, 805

Magnetic resonance imaging, 806  
 Follow-up imaging of colorectal carcinoma, 809  
 Other imaging modalities, 810

### 40 Endosonographic Staging of Rectal Cancer, 813

Clive I. Bartram and John Beynon

Technique and apparatus, 813  
 Normal endosonographic anatomy of the rectal wall, 814  
 Assessment of depth of tumor penetration, 815  
 Lymph node involvement, 818  
 Local recurrence, 820  
 The role of endosonography in rectal cancer, 821

### 41 Colorectal Cancer Screening, 824

F.T. Fork and Giles W. Stevenson

Incidence of colorectal neoplasia, 824  
   Colorectal cancer, 824  
   Colorectal adenoma, 824  
 Risk factors for CRC, 824  
   Age and sex, 824  
   Adenoma patient, 824  
   Carcinoma patient, 825  
   Cancer family syndromes, 825  
   Chronic ulcerative colitis, 827  
   Crohn's enterocolitis, 829  
 Prevention of CRC, 829  
   General principles of screening, 829  
   Principles in evaluating screening programs, 830  
   Screening methodology, 831  
   Diagnostic follow-up procedures, 832  
   Results of screening programs to date, 833  
   Summary and screening guidelines, 835

### 42 Defecography: Techniques and Normal Findings, 840

Frederick M. Kelvin and Giles W. Stevenson

Anatomic and physiologic considerations, 840  
 Techniques of defecography, 841  
   Defecographic equipment, 841  
   Contrast media, 841  
   Vaginal opacification, 841  
   Special commode, 842  
   Recording of rectal evacuation, 842  
 Variations of defecographic technique, 844  
   Balloon proctography, 844  
   The balloon expulsion test, 844  
   Simplified defecography, 844  
   Quantification of rectal evacuation, 844  
 Examination procedure, 844  
   Aiding mechanisms, 845  
 Normal appearances, 845  
   Anal canal, 845  
   Anorectal junction level, 845  
   Anorectal angle, 845  
   Rectovaginal septum, 847  
   Changes during defecography, 847

### 43 Investigation of Constipation and Incontinence, 852

Philip J. Shorvon and Michael Henry

Constipation, 852  
   Patient history and definition, 852

- Investigation, 852
- Symptoms suggestive of onset in childhood, 852
- Onset of symptoms in adulthood, 855
- Pseudoobstruction, 855
- Constipation in the elderly, 856
- Chronic idiopathic constipation, 856
- Measurement of colonic transit, 857
- Slow transit constipation, 858
- Outlet obstruction, 858
- Incontinence, 858
  - Enteric causes, 858
  - Physiologic components of the mechanisms of fecal continence and their testing, 858
  - Physiologic tests of anorectal function, 863
  - Neurologic causes, 864
  - Radiologic value in investigation of incontinence patients, 864
  - Role of defecography, 865
- Rectal prolapse, 865
  - Role of proctography in prolapse, 868
  - Magnetic resonance imaging, 870

#### 44 Anal Endosonography, 873

Clive I. Bartram

- Technique, 873
- Normal anatomy, 873
- Internal sphincter abnormalities, 875
- External sphincter abnormalities, 875
- Incontinence, 877
- Constipation, 879
- Conclusion and indications, 879

#### 45 Applications and Limitations of Imaging in Staging and Follow-up of Gastrointestinal Neoplasms, 881

David G. Bragg, William M. Thompson, and Edward W. Humphrey

- Esophageal cancer, 881
- Gastric cancer, 883
- Colorectal cancer, 885

### PART VIII MISCELLANEOUS DISORDERS OF THE GASTROINTESTINAL TRACT

#### 46 Infections and Infestations, 888

Maurice M. Reeder and Philip E.S. Palmer

- Bacterial infections, 888
  - Gastrointestinal tuberculosis, 888
  - Salmonella infections, 895
  - Typhoid fever, 895
  - Bacillary dysentery, 898
  - Campylobacter infection, 900
  - Pseudomembranous enterocolitis, 901
  - Acute gastroenteritis, 903
  - Helicobacter pylori, 904
- Chlamydia infections, 904
  - Lymphogranuloma venereum, 904
- Fungal infections, 908
  - Gastrointestinal candidiasis, 908
  - Gastrointestinal histoplasmosis, 909
- Unknown etiology, 910
  - Tropical sprue, 910
- Parasitic diseases, 913

- Parasitic infections, 913
- Helminthic infections, 926

#### 47 Gastrointestinal Manifestations of the Acquired Immunodeficiency Syndrome, 952

Peter J. Feczko

- Human immunodeficiency virus, 952
- Clinical presentation and staging of HIV infection, 952
- Epidemiology and natural history, 953
- Clinical testing, 953
- Imaging of the patient with HIV infection, 954
- Opportunistic infections of the GI tract, 954
  - Enteric pathogens, 954
  - AIDS and HIV enteropathy, 959
  - Hepatobiliary abnormalities, 960
- Neoplastic disease in AIDS, 961
  - Kaposi's sarcoma, 961
  - AIDS-related lymphoma, 962
- Radiologic practice in an HIV environment, 963

#### 48 Gastrointestinal Bleeding: Endoscopy and Diagnostic Approach, 967

D.E. Beckly

- Clinical aspects, 967
- Timing of endoscopy, 967
- Technique of upper GI endoscopy in acute bleeding, 968
- Common conditions and their treatment, 968
  - Esophageal varices, 968
  - Gastric varices, 969
  - Varices and pregnancy, 970
  - Bleeding peptic ulcer, 970
  - Other common causes of upper GI bleeding, 972
  - Uncommon or infrequently recognized causes of upper GI bleeding, 974
  - Lower GI bleeding, 976
- Summary, 979

#### 49 Scintigraphic Evaluation of Gastrointestinal Hemorrhage, 983

Alan Siegel and Abass Alavi

- Extent of the problem and causes of bleeding, 983
- Surgery for the treatment of GI hemorrhage, 983
- Nonscintigraphic modes of evaluation, 984
- Scintigraphic modes of evaluation, 984
  - Sulfur colloid, 984
  - Albumin, heat-damaged red blood cells, and DTPA, 986
  - Labeled red blood cells, 986
  - Meckel's scans, 989
- Conclusions, 992

#### 50 Angiographic Diagnosis and Therapy of Gastrointestinal Tract Bleeding, 994

Frederick S. Keller, Robert E. Barton, and Josef Rosch

- Acute GI hemorrhage, 994
- Diagnosis of acute arterial bleeding, 994
- Pharmacoangiography, 994
- Angiographic control of acute GI hemorrhage, 995
  - Vasoconstrictive infusion therapy, 995
  - Arterial embolotherapy, 997
  - Chronic GI hemorrhage, 999
  - Angiodysplasia, 1000

- Meckel's diverticulum, 1004
- GI bleeding from extraalimentary tract sources, 1004
  - Hemobilia, 1004
  - Pancreatic hemorrhage, 1004
- Aortoenteric and arterioenteric fistulas, 1005
- GI hemorrhage of venous origin, 1006
  - Diagnosis of venous bleeding, 1006
  - Therapy for variceal hemorrhage, 1006
- Transhepatic embolization of gastroesophageal varices, 1006
- Transjugular intrahepatic portosystemic shunting, 1007

## VOLUME TWO

### PART IX PANCREAS

#### 51 Radiology of the Pancreas: Diagnostic and Interventional Techniques, 1017

Patrick C. Freeny

- Diagnostic examinations, 1017
- Interventional procedures, 1017
- Computed tomography, 1017
  - Technique, 1018
  - Normal anatomy, 1018
- Magnetic resonance imaging, 1018
  - Technique, 1018
  - Normal anatomy, 1019
- Endoscopic retrograde cholangiopancreatography, 1022
  - Technique, 1022
  - Normal anatomy, 1022
- Percutaneous transhepatic cholangiography, 1022
  - Technique, 1022
- Angiography, 1023
  - Technique, 1023
  - Normal anatomy, 1023
- Transhepatic pancreatic venography, 1023
  - Technique, 1023
  - Normal anatomy, 1024
- Fine-needle aspiration biopsy, 1024
  - Technique, 1024
- Aspiration of pancreatic fluid collections and percutaneous pancreatography, 1025
- Percutaneous catheter drainage, 1025

#### 52 Ultrasonography, 1027

George R. Leopold

- General considerations, 1027
- Patient preparation, 1027
- Conduct of the examination, 1027
  - Real-time examination, 1028
  - Static gray scale examination, 1028
- Endoscopic sonography, 1028
- Operative sonography, 1029
- Normal anatomy, 1029
  - Regional anatomy, 1029
  - Pancreatic size, 1031
  - Pancreatic texture, 1031
- Pancreatic pathology, 1031
  - Pancreatitis, 1031
    - Texture, 1031
    - Size, 1031
    - Other findings, 1031
  - Clinical utility, 1032

- Cysts, 1033
  - Ordinary pseudocysts, 1033
  - Ectopic pseudocyst, 1034
  - Temporal relationships, 1034
  - False-positive pseudocysts, 1035
  - Other cystic lesions, 1035
- Carcinomas, 1036
  - Pancreatic biopsy, 1037

#### 53 Embryology, Normal Variation, and Congenital Anomalies of the Pancreas, 1039

Scott J. Schulte

- Embryology, 1039
- Variations of duct drainage, 1039
- Fusion anomalies, 1042
  - Pancreas divisum, 1042
  - Incomplete pancreas divisum, 1044
  - Stenosis of main pancreatic duct, 1045
- Agensis and hypoplasia, 1045
- Annular pancreas, 1046
- Ectopic pancreas, 1048
- Duplication anomalies, 1049
- Anomalous ducts producing pseudomasses, 1049

#### 54 Inflammatory Disease of the Pancreas, 1052

Patrick C. Freeny and Charles A. Rohrmann, Jr.

- Pancreatitis: general considerations, 1052
  - Cambridge and Marseille classifications, 1052
  - Acute pancreatitis, 1052
  - Chronic pancreatitis, 1052
- Radiologic diagnosis of pancreatitis, 1053
  - Acute pancreatitis, 1053
  - Radiologic diagnosis, 1053
  - Contrast studies, 1053
  - Cross-sectional imaging studies, 1054
  - Chronic pancreatitis, 1056
- Clinical and radiologic staging of pancreatitis, 1062
  - Acute pancreatitis, 1062
  - Chronic pancreatitis, 1065
- Etiology of pancreatitis: radiologic evaluation, 1066
  - Biliary tract disease, 1066
  - Stomach and duodenum, 1066
  - Pancreas divisum, 1066
  - Hereditary pancreatitis, 1067
  - Traumatic pancreatitis, 1067
- Complications of pancreatitis: radiologic detection and treatment, 1068
  - Pancreatic and extrapancreatic fluid collections, 1068
  - Radiologic diagnosis, 1068
  - Ultrasonography and computed tomography, 1069
  - Percutaneous catheter drainage, 1070
  - Pancreatic phlegmon, 1074
  - Pancreatic abscess, 1074
  - Percutaneous catheter drainage, 1076
  - Pancreatic necrosis, 1076
  - Biliary complications, 1076
  - Nonoperative biliary drainage, 1079
  - Vascular complications, 1080
  - Pancreatic ascites, 1080
  - Osseous complications, 1083
  - Pulmonary complications, 1084
- Preoperative and postoperative radiologic evaluation of pancreatitis, 1086
  - Chronic pancreatitis, 1086

- 55 Endoscopic Therapy of Chronic Pancreatitis, 1091**  
**Richard A. Kozarek**  
 Relapsing pancreatitis and chronic pain, 1091  
 Sphincterotomy, 1091  
 Calculus extraction, 1091  
 Prosthesis placement, 1094  
 Pseudocyst drainage, 1097  
 Biliary obstruction, 1098  
 Abandoned endoscopic therapies, 1099
- 56 Extracorporeal Shock Wave Lithotripsy of Pancreatic Duct Calculi, 1101**  
**Tilman Sauerbruch**  
 Principles of extracorporeal shock wave lithotripsy, 1101  
 Indications, 1102  
 Procedure, 1102  
 Results, 1102  
 Adverse effects, 1105  
 Conclusion, 1106
- 57 Pancreatic Adenocarcinoma: Radiologic Diagnosis and Staging, 1107**  
**David H. Stephens**  
 Clinical manifestations, 1107  
 Pathologic anatomy and biologic behavior, 1107  
 Diagnostic imaging: rationale, 1109  
 Diagnosis, 1109  
 Staging, 1109  
 Choice of methods, 1110  
 Computed tomography, 1110  
 Technical considerations, 1110  
 Interpretation, 1112  
 Ultrasonography, 1118  
 Technical considerations, 1118  
 Interpretation, 1119  
 Complementary roles of CT and ultrasonography, 1119  
 Magnetic resonance imaging, 1120  
 Differential diagnosis, 1120  
 Normal variants, 1120  
 Extrapaneatic masses, 1121  
 Carcinoma versus pancreatitis, 1121  
 Other pancreatic tumors, 1121  
 Endoscopic retrograde cholangiopancreatography, 1122  
 Percutaneous transhepatic cholangiography, 1123  
 Angiography, 1123  
 Gastrointestinal examinations, 1124  
 Percutaneous biopsy, 1125
- 58 Endosonography in the Diagnosis and Staging of Pancreatic Cancer, 1127**  
**Kenjiro Yasuda, Masatugu Nakajima, and Keiichi Kawai**  
 Demonstration of the whole pancreas by endoscopic ultrasonography, 1127  
 Detectability of pancreatic tumors by endoscopic ultrasonography, 1127  
 Differentiation of cancer from pancreatitis, 1127  
 Staging of pancreatic cancer by endoscopic ultrasonography, 1129  
 Summary, 1130
- Role of pancreatic endoscopic ultrasonography, 1131  
 Summary, 1131
- 59 Rare Tumors of the Pancreas, 1132**  
**Didier Mathieu, Alain Rahmouni, Serge Agostini, Pierre-Jean Valette, and Pablo R. Ros**  
 Intraductal pancreatic tumors, 1132  
 Intraductal papillary neoplasms, 1133  
 Intraductal mucin-hypersecreting tumors of the pancreatic ducts, 1134  
 Ductectatic mucinous cystadenoma and cystadenocarcinoma, 1134  
 Imaging procedures, 1135  
 Serous (microcystic) adenomas, 1138  
 Pathologic features, 1139  
 Imaging procedures, 1141  
 Mucinous cystic neoplasms, 1141  
 Pathologic features, 1144  
 Imaging procedures, 1146  
 Papillary cystic neoplasm, 1149  
 Pathologic features, 1150  
 Imaging procedures, 1151  
 Subtypes of ductal adenocarcinoma, 1152  
 Mucinous carcinoma, 1152  
 Adenosquamous carcinoma, 1152  
 Giant cell, or pleomorphic, carcinoma, 1152  
 Pancreatic giant cell tumor with osteoclast-type cells, 1153  
 Acinar cell carcinoma, 1153  
 Acinar cell cystadenocarcinoma, 1155  
 Sarcomas, 1155  
 Pancreatoblastoma, 1155  
 Other rare pancreatic lesions, 1156  
 Nontumoral true cysts of the pancreas, 1156  
 Adult polycystic kidney disease, 1156  
 Von Hippel-Lindau disease, 1156  
 Cystic fibrosis, 1157  
 Cystic islet cell tumors, 1157  
 Pancreatic metastases, 1158  
 Primary hydatid disease of the pancreas, 1159  
 Cystic teratoma, 1158  
 Pancreatic hemangioma, 1158  
 Pancreatic lymphangioma, 1160  
 Lymphoma, 1162  
 Plasmocytoma, 1163
- 60 Islet Cell Tumors of the Pancreas: Diagnosis and Localization, 1167**  
**Donald L. Miller**  
 Epidemiology, 1167  
 Pancreatic islet, 1167  
 Pathology, 1167  
 Multiple endocrine neoplasia, 1168  
 Clinical syndromes and diagnosis, 1169  
 Insulinoma, 1169  
 Gastrinoma, 1170  
 Glucagonoma, 1171  
 VIPoma, 1171  
 Somatostatinoma, 1171  
 Other functioning tumors, 1172  
 Nonfunctioning tumors, 1172  
 Localization, 1173  
 When is localization required?, 1173  
 Specific localization procedures, 1173  
 How should localization be done?, 1191

**61 Pancreatic Transplant Imaging, 1197**

William T.C. Yuh, Donald R. Hawes,  
Monzer M. Abu-Yousef, Michael M. Abecassis,  
and Edmund A. Franken, Jr.

  - Hepatic hilar cysts, 1319
  - Other conditions, 1319

**67 Neoplastic Diseases of the Gallbladder and Biliary Tract, 1325**

Robert S. Perret, M. Kristin Thorsen, and  
Thomas L. Lawson

- Gallbladder carcinoma, 1325
  - Pathogenesis, 1325
  - Presentation, 1325
  - Pathology, 1325
  - Mode of spread, 1326
  - Staging, 1327
  - Diagnostic imaging, 1327
  - Prognosis and treatment, 1333
- Cholangiocarcinoma, 1333
  - History, 1333
  - Pathology, 1333
  - Location, 1334
  - Presentation, 1334
  - Diagnostic imaging, 1334
  - Differential diagnosis, 1336
  - Management, 1340

## 68 Endoscopic Intervention in Calculus Disease, 1344

Joseph W.C. Leung and Peter B. Cotton

- Diagnostic ERCP, 1344
- Endoscopic management of duct stones, 1345
  - Technique, 1345
  - Success rates and complications, 1346
  - Indications, 1347
  - Technical difficulties of sphincterotomy and stone extraction, 1348
- Choledochoscopy, 1350
- Endoscopic management of gallbladder stones, 1351

## 69 Interventional Techniques in the Gallbladder and Biliary Tract: Extracorporeal Shock Wave Lithotripsy, 1355

Dermot E. Malone and Joseph T. Ferrucci

- Physical principles, 1355
- Treatment of gallbladder stones, 1355
  - Patient selection, 1355
  - Results, 1359
  - Contraindications, 1359
  - Oral bile acids, 1359
  - Preliminary investigations, 1359
  - Procedure, 1359
  - Symptoms and complications after biliary lithotripsy, 1360
  - Follow-up, 1360
  - Long-term risks of gallbladder conservation, 1360
  - Biliary lithotripsy and transcatheter stone dissolution, 1361
  - Summary, 1361
- Treatment of bile duct stones, 1361
  - Patient selection, 1361
  - Results, 1361
  - Contraindications, 1364
  - Preliminary investigations, 1364
  - Procedure, 1364
  - Follow-up and repeat sessions, 1364
  - Complications, 1364
  - Summary, 1364
  - Postmortem, 1365

## 70 Percutaneous Intervention in Benign Disease of the Gallbladder and Biliary Ducts, 1367

Giles Boland, Steven L. Dawson, Michael J. Lee, Peter R. Mueller, and H. Joachim Burhenne

- Bile ducts, 1367
  - Biliary duct stone disease, 1367
  - Percutaneous choledocholithotomy, 1367
  - Shock wave lithotripsy, 1373
  - Transcholecystic extraction, 1373
- Combined radiologic and surgical techniques, 1374
  - Minicholecystostomy, 1374
  - Percutaneous cholecystolithotomy, 1375
  - Dissolution of common bile duct stones, 1375
  - Fragmentation, 1375
- Gallbladder, 1375
  - Gallbladder stones, 1375
  - Percutaneous cholecystolithotomy: large tract, 1376
  - Percutaneous cholecystolithotomy: small tract, 1378
  - Percutaneous dissolution, 1378
- Interventional procedures for acute cholecystitis, 1380

- Fine-needle aspiration, 1380
- Percutaneous cholecystostomy, 1381
- Pericholecystic abscess drainage, 1381
- Gallbladder biopsy, 1382
- Gallbladder and cystic duct ablation, 1382
- Percutaneous balloon dilation of benign biliary strictures, 1383
  - Patient selection, 1383
  - Imaging, 1383
  - Technique, 1385
  - Access, 1386
  - Analgesia, 1386
  - Antibiotic coverage, 1386
  - Number of dilations, 1386
  - Role of stenting, 1389
  - Results, 1390
  - Metallic stents, 1396
  - Morbidity and mortality, 1396

## 71 Percutaneous Intervention in Malignant Biliary Tract Disease, 1399

J. Stephen Fache

- Indications, 1399
- Contraindications, 1400
- Technique, 1400
  - General considerations, 1400
  - Equipment, 1401
  - Anesthetic and analgesic administration, 1401
  - Technical approach: right and left biliary duct entry, 1401
  - Predrainage cholangiography, 1403
  - Catheter insertion, 1405
  - Catheter selection, 1407
  - Combined transhepatic-endoscopic approach (rendezvous procedure), 1411
  - Alternate access routes, 1414
- Management of the catheter and patient after drainage, 1417
- Complications of biliary drainage, 1418
- Results of biliary drainage, 1420

## 72 Percutaneous Endoscopy of the Biliary Tract, 1423

Chia-Sing Ho and Eugene Y. Yeung

- Endoscopes, 1423
- Technique, 1424
- Indications, 1425
  - Stones in the biliary tract, 1425
  - Bile duct obstruction, 1426
  - Percutaneous biliary interventions, 1426
- Results and complications, 1426
  - Gallstones, 1426
  - Common bile duct and intrahepatic stones, 1427
- Conclusion, 1429

## 73 Endoscopic Intervention in Biliary Duct Neoplasm, 1430

Kees Huibregtse and S. Rivera-MacMurray

- Techniques, 1430
  - Stent exchange, 1431
  - Rendezvous procedure, 1431
- Indications for biliary stent placement, 1432
  - Preoperative biliary drainage, 1432
  - Palliative biliary drainage, 1432

- Complications, 1434
  - Early, 1434
  - Late, 1436
- Metallic expanding stents, 1436
- Comparison of endoscopic stents to other palliative treatment modalities, 1437
  - Percutaneous versus endoscopic stent placement, Surgical bypass versus endoscopic stent, 1437
- Conclusion, 1438

## PART XI LIVER

### 74 Normal Segmental Anatomy of the Liver, 1440

Rendon C. Nelson

- Historical background, 1440
- Segmental anatomy of the liver, 1440
  - Segment I, 1441
  - Segment II, 1441
  - Segment III, 1442
  - Segment IV, 1442
  - Segment V, 1442
  - Segment VI, 1444
  - Segment VII, 1444
  - Segment VIII, 1444
- Portal veins, 1444
- Hepatic veins, 1444
- Hepatic arteries and bile ducts, 1446
- Diagnostic imaging and segmental anatomy, 1446
  - Dynamic computed tomography, 1446
  - Delayed computed tomography, 1447
  - Computed tomography during arterial portography, 1447
  - Three-dimensional computed tomography during arterial portography, 1448
  - Ultrasound, 1449
  - Magnetic resonance imaging, 1449
- Surgical implications of segmental anatomy, 1451

### 75 Hepatic Computed Tomography, 1453

Patrick C. Freeny

- CT scanner technology, 1453
  - Rotating gantry scanners, 1453
  - Spiral scanners, 1453
  - Electron-beam scanners (ultrafast CT), 1453
- Contrast administration, 1453
  - Noncontrast CT, 1453
  - Incremental dynamic bolus CT, 1455
  - Delayed iodine scan, 1458
  - CT angiography and CT portography, 1459
- Applications of IDBCT, DIS, and CT-A/CT-AP, 1463
  - Abdominal survey, 1463
  - Liver survey, 1463
  - Lesion detection, 1464
- Conclusions, 1464

### 76 Hepatic Ultrasound, 1466

Thomas C. Winter III and Faye C. Laing

- Technical considerations, 1466
- Anatomic considerations, 1468
  - Diffuse parenchymal disease, 1469
- Hepatic vascular system, 1469
- Focal hepatic lesions, 1473
  - General concepts, 1473
  - Cysts, 1474

- Abscesses, 1475
- Trauma, 1475
- Primary benign hepatic neoplasms, 1476
- Primary malignant hepatic lesions, 1477
- Metastases to the liver, 1478
- Rare focal liver lesions, 1480
  - Doppler analysis of focal hepatic lesions, 1480
- Intraoperative sonography, 1481

### 77 Hepatic Magnetic Resonance Imaging, 1486

Guy Marchal

- General aspects, 1486
- Technical considerations, 1486
  - Imaging strategies, 1487
  - Spatial resolution, 1487
  - Contract-to-noise ratio, 1487
  - Motion-induced artifacts, 1487
  - Techniques to reduce motion artifacts, 1487
  - Influence of magnetic field, 1489
- Tissue characterization, 1490
  - Focal liver lesions, 1491
  - Diffuse liver disease, 1496
- Contrast-enhanced MRI, 1496
- Vascular imaging, 1503

### 78 Liver and Spleen Scintigraphy, 1508

William C. Vezina

- Technetium 99m sulfur colloid, 1508
  - Imaging, 1508
  - Primary tumor, 1508
  - Secondary tumor, 1514
  - Nontumor, 1514
- Tc 99m-IDA hepatic parenchymal imaging, 1522
  - Primary tumor, 1523
  - Nontumor, 1523
- Tc 99m-red blood cell imaging, 1527
  - Hemangioma, 1527
- Tc 99m heat-damaged RBC, 1528
- Indium 111/Tc 99m WBC, 1529
  - Indium 111-white blood cell imaging, 1529
  - Tc 99m WBC, 1531
- Ga 67, 1531
  - Hepatocellular carcinoma (hepatoma), 1531
  - Abscess, 1531
- Miscellaneous, 1531
  - Tc 99m microspheres, 1531
  - Tc 99m phosphate, 1531
  - Xe 133, 1531
  - Indium 111 platelets, 1532

### 79 Hepatic Cirrhosis, 1534

Yugi Itai and Yoshihisa Kurosaki

- General considerations, 1534
- Classifications of cirrhosis, 1534
- Clinical aspects of cirrhosis, 1534
- Diagnosis of cirrhosis, 1534
  - Imaging diagnosis, 1535
  - Cirrhotic findings on individual modalities, 1537.

### 80 Fatty Infiltration, 1547

Kuni Ohtomo

- Pathophysiology, 1547
  - Classification, 1547

- Kwashiorkor, 1547
- Prolonged parenteral nutrition, 1548
- Alcoholic liver diseases, 1548
- Acute fatty liver of pregnancy, 1549
- Reye's syndrome, 1549
- Radiology of the fatty liver, 1549
  - Radiologic classification of the fatty liver, 1549
  - Fatty infiltration in hepatitis and cirrhosis, 1553
  - Differential diagnosis of focal fatty infiltration from hepatic masses, 1553
  - Round fatty infiltration, 1554
  - Focally spared liver, 1554
- Pitfalls in the evaluation of fatty liver, 1556
  
- 81 Hemochromatosis, 1560**  
**Brigid M. Gerety**
  - Classification, 1560
    - Primary hemochromatosis, 1560
    - Secondary hemochromatosis, 1560
    - Parenteral iron overload, 1560
  - Clinical presentation, 1561
  - Hepatic complications, 1561
  - Diagnosis, 1561
    - Serologic tests, 1561
    - HLA typing, 1562
    - Liver biopsy, 1562
  - Noninvasive evaluation of the liver, 1562
    - Single-energy computed tomography, 1563
    - Dual-energy computed tomography, 1563
    - Magnetic resonance imaging, 1563
    - Superconducting quantum-interference device, 1564
  - Treatment, 1564
  
- 82 Portal Venous System, 1566**  
**Patrick C. Freeny and Yügi Itai**
  - Portal venous system anatomy, 1566
  - Portal venography, 1566
    - Splenoportography, 1566
    - Transhepatic portography, 1566
    - Transjugular portography, 1567
    - Arterial portography, 1567
    - Umbilical portography, 1572
  - Portal hypertension, 1572
    - Hyperkinetic portal hypertension, 1572
    - Increased portal venous resistance, 1574
    - Radiologic evaluation of intrahepatic portal hypertension, 1574

## PART XII SPLEEN

### 92 Radiographic Techniques and Normal Anatomy of the Spleen, 1751

Kedar N. Chintapalli

- Radiographic evaluation of the spleen: techniques, 1751
  - Plain radiographs, 1751
  - Sonography, 1751
  - Radionuclide studies, 1753
  - Computed tomography, 1757
  - Magnetic resonance imaging, 1757
  - Angiography, 1759
- Normal anatomy, 1760
  - Gross anatomy, 1760
  - Histology, 1760
  - Embryology, 1761
- Functions of the spleen, 1762

### 93 Diseases of the Spleen, 1763

Kedar N. Chintapalli

- Anatomic variants, 1763
  - Accessory spleen, 1763
  - Splenic lobulation and clefts, 1765
  - Splenorenal and splenogonadal fusion, 1765
  - Asplenia and polysplenia syndromes, 1766
  - Functional asplenia, 1766
  - Ectopic spleen, 1769
  - Wandering spleen, 1769
- Splenomegaly, 1771
  - Hypersplenism, 1772
- Splenic calcifications, 1772
- Focal mass lesions of the spleen, 1774
  - Splenic cysts, 1774
  - Splenic infarcts, 1776
  - Splenic hematoma, 1777
  - Splenic infections and abscess, 1780
  - Tumors of the spleen, 1780
- Parasplenic abnormalities, 1788
  - Splenic vein thrombosis, 1789
- Splenectomy, 1789
- Interventional procedures, 1791
  - Splenic artery embolization, 1791

## PART XIII PERITONEUM AND RETROPERITONEUM

### 94 Diseases of the Peritoneum, 1795

Dennis M. Balfe

- Anatomy of the peritoneal cavity, 1795
  - Embryology, 1795
  - Adult anatomy, 1797
- Pathology of the peritoneal cavity, 1801
  - Fluid collections, 1801
  - Peritonitis, 1802
  - Primary tumors, 1803
  - Secondary tumors, 1803

### 95 Diseases of the Retroperitoneum and Mesentery, 1807

Dennis M. Balfe

- Retroperitoneal anatomy, 1807
  - The laminar retroperitoneum, 1807
  - Psoas muscle, 1809
  - Posterior pararenal space, 1809
  - Perirenal space, 1810
    - Anterior pararenal space, 1810
    - Great vessel space, 1811
- Specific retroperitoneal pathology, 1812
  - Primary neoplasms, 1812
  - Metastatic neoplasms, 1815
  - Retroperitoneal fibrosis, 1815
  - Fluid collections, 1816
  - Primary inflammation, 1818
  - Vascular conditions, 1819
- Mesenteric anatomy, 1820
- Pathologic conditions of the small bowel mesentery, 1822
  - Diseases arising in the bowel, 1822
  - Diseases of retroperitoneal origin, 1823
  - Diseases of peritoneal origin, 1823
  - Diseases of systemic origin, 1823
  - Diseases primary to the mesenteries, 1824

## PART XIV PEDIATRIC GASTROINTESTINAL RADIOLOGY

### 96 Pediatric Pharynx and Esophagus, 1826

Marilyn J. Siegel

- Techniques, 1826
- Pharynx, 1826
  - Normal anatomy, 1826
  - Motility disturbances, 1828
  - Congenital anomalies, 1829
  - Diverticula and webs, 1831
  - Masses, 1832
  - Inflammatory lesions, 1834
  - Trauma, 1835
- Esophagus, 1836
  - Normal anatomy, 1836
  - Motility, 1838
  - Congenital abnormalities, 1839
  - Neoplasms, 1844
  - Esophagitis, 1846
  - Esophageal varices, 1848
  - Trauma, 1850

### 97 Pediatric Diaphragm and Esophagogastric Junction, 1853

David Stringer

- Congenital and developmental anomalies of the diaphragm, 1853
  - Bochdalek's (pleuroperitoneal) hernia, 1853
  - Diaphragmatic eventration, 1856
  - Morgagni's (retrosternal) hernia, 1856
  - Miscellaneous congenital hernial defects, 1858
  - Traumatic hernia, 1858
- Diaphragm paralysis, 1858
- Gastroesophageal reflux and hiatus hernia, 1859
  - Imaging and other investigations for hiatus hernia and gastroesophageal reflux, 1859
  - Gastroesophageal reflux complications, 1861

**98 Pediatric Stomach, 1865****David Stringer**

- Developmental and congenital gastric anomalies, 1865
  - Situs, 1865
  - Duplication of the stomach, 1865
  - Microgastria and agastria, 1865
  - Gastric atresia or web, 1865
- Acquired outlet obstruction of the stomach, 1866
  - Hypertrophic pyloric stenosis, 1868
  - Conditions that mimic hypertrophic pyloric stenosis, 1869
- Acquired abnormalities of the stomach, 1869
  - Gastritis, 1869
  - Gastric ulcer, 1872
  - Gastric neoplasms, 1873
  - Miscellaneous disorders of the stomach, 1873

**99 Pediatric Small Bowel, 1878****David Stringer**

- General considerations and normal rotation, 1878
- Congenital anomalies, 1878
  - Abnormal rotation and fixation of the midgut (malrotation and malfixation), 1878
  - Duodenal atresia and stenosis, 1884
  - Annular pancreas, 1884
  - Preduodenal portal vein, 1885
  - Jejunum or ileal atresia or stenosis, 1885
  - Meconium ileus, 1886
  - Omental and mesenteric cysts, 1888
  - Omphalomesenteric duct anomalies, 1889
  - Anterior abdominal wall defects, 1890
- Infection and inflammation, 1891
  - Gastroenteritis, 1891
  - Meconium peritonitis, 1891
  - Idiopathic inflammatory bowel disease, 1892
- Small bowel neoplasms, 1894
  - Benign tumors, 1894
  - Malignant tumors, 1895
- Trauma and hemorrhage, 1896
  - Trauma, 1896
  - Henoch-Schönlein purpura, 1896
- Malabsorption and mucosal disease, 1896
  - Cystic fibrosis, 1896
  - Distal intestinal obstruction syndrome (meconium ileus equivalent), 1897
  - Shwachman syndrome, 1897
  - Celiac disease, 1898
  - Intestinal lymphangiectasis, 1898
  - Immunoglobulin deficiency syndromes, 1898
  - Graft-versus-host disease, 1898
- Short gut syndrome, 1898
- Intestinal obstruction, 1899
  - Intussusception, 1899
- Pseudoobstruction, 1902
- Miscellaneous disorders, 1903
  - Superior mesenteric artery and cast syndromes, 1903
  - Duodenal ulcer, 1903
  - Dermatomyositis, 1904

**100 Pediatric Large Bowel, 1907****David Stringer**

- Embryology, 1907
- Anatomy, 1907
  - Normal appearance, 1907

- Lymphoid follicular pattern and lymphoid hyperplasia, 1907
- Developmental and congenital anomalies, 1909
  - Large bowel atresia, 1909
  - Anorectal malformations, 1909
- Functional motility disorders, 1912
  - Abnormal myenteric plexus, 1913
  - Normal myenteric plexus, 1915
- Inspissated milk or milk curd syndrome, 1915
- Infection and inflammation, 1916
  - Neonatal necrotizing enterocolitis, 1916
  - Neutropenic colitis (necrotizing enteropathy or typhlitis), 1919
  - Idiopathic inflammatory bowel disease, 1919
- Appendicitis, 1925
- Neoplasms, 1926
  - Benign tumors, 1926
  - Malignant tumors, 1927
- Trauma, 1927
  - Miscellaneous disorders, 1930
  - Cystic fibrosis, 1930

**101 Pediatric Spleen, 1932****Marilyn J. Siegel**

- Normal anatomy, 1932
- Normal variants and congenital anomalies, 1932
  - Wandering spleen, 1933
  - Accessory spleen, 1933
  - Visceroatrial anomalies, 1933
- Splenomegaly, 1935
- Inflammatory disease, 1936
  - Pyogenic abscess, 1936
  - Fungal abscess, 1937
  - Granulomatous infection, 1937
- Neoplasm, 1937
  - Benign tumors, 1937
  - Malignant tumors, 1937
  - Secondary tumors, 1937
  - Cysts, 1938
- Trauma, 1939
- Infarction, 1941

**102 Pediatric Pancreas, 1944****Marilyn J. Siegel**

- Anatomy, 1944
- Imaging technique, 1944
- Imaging features, 1944
- Developmental variants and anomalies, 1946
  - Annular pancreas, 1946
  - Dorsal pancreas agenesis, 1946
  - Ectopic pancreas, 1947
- Congenital diseases, 1947
  - Cystic fibrosis, 1947
  - Shwachman-Diamond syndrome, 1948
  - Von Hippel-Lindau disease, 1949
  - Nesidioblastosis, 1950
- Pancreatitis, 1950
  - Acute pancreatitis, 1950
  - Chronic pancreatitis, 1952
- Neoplasms, 1952
  - Endocrine tumors, 1952
  - Exocrine tumors, 1954
  - Cystic neoplasms, 1954
- Trauma, 1054

**103 Pediatric Liver and Biliary Tract, 1958**

Marilyn J. Siegel

Technique, 1958

Liver, 1958

Normal anatomy, 1958

Inflammatory lesions, 1958

Neoplasms, 1961

Primary malignant neoplasms, 1961

Fibrolamellar hepatocarcinoma, 1964

Hepatic metastases, 1964

Benign neoplasms, 1966

Diffuse diseases, 1969

Disorders of hepatic vessels, 1971

Trauma, 1974

Other hepatic lesions, 1975

Diseases of the biliary tract, 1975

Congenital anomalies of the biliary tree, 1976

Spontaneous perforation of the common bile duct, 1977

Biliary tract obstruction, 1978

Gallbladder, 1980

Hydrops, 1980

Inflammatory conditions, 1980

Cholelithiasis, 1981

Sludge, 1981

Biliary atresia and neonatal hepatitis, 1981

Periappendiceal abscess, 2006

Enteric tumors, 2007

Anastomotic leaks, 2007

**106 Percutaneous Fluoroscopically Guided Gastrostomy, 2011**

Chia-Sing Ho and Eugene Y. Yeung

Historical review, 2011

Indications, 2011

Nutritional support, 2011

Decompression of the stomach and small intestine, 2011

Contraindications, 2011

Technique, 2012

Patient preparation and preprocedural assessment, 2012

Choice of puncture site and needle, 2012

Gastrostomy insertion, 2013

Placement of the gastrostomy catheter, 2013

Placement of the transgastric jejunostomy catheter, 2013

Choice of gastrostomy catheter, 2014

Modifications to the technique, 2015

Aftercare, 2016

Long-term management of gastrostomy catheters, 2016

Results and complications, 2016

Gastrostomy insertion in infants, 2018

Comparison of fluoroscopically guided, surgical, and endoscopic gastrostomy, 2018

Conclusion, 2018

**PART XV INTERVENTIONAL ABDOMINAL RADIOLOGY****104 Percutaneous Biopsy of Abdominal Masses, 1987**Robert A. Lee, Carl C. Reading, and  
J. William Charboneau

Indications and contraindications, 1987

Needle selection, 1987

Patient preparation, 1988

Guidance systems, 1988

Fluoroscopy, 1989

Computed tomography, 1989

Ultrasonography, 1989

Selected biopsy sites, 1991

Liver, 1991

Pancreas, 1992

Adrenal gland and kidney, 1992

Retroperitoneum and pelvis, 1994

Complications, 1995

Summary, 1996

**105 Percutaneous Abscess Drainage for Gastrointestinal Diseases, 1998**Eric vanSonnenberg, Horacio D'Agostino, Giovanna Casola,  
and Robert Sanchez

Fundamentals of PAD, 1998

Imaging for PAD, 1998

Diagnostic aspiration, 1999

Technique and materials, 1999

Follow-up care, 2000

Specific gastrointestinal abscesses, 2001

Hepatic, 2001

Pancreatic abscesses and fluid collections, 2002

Splenic abscess, cysts, and tumors, 2004

Crohn's abscess, 2005

Peridiverticular abscess, 2005

**PART XVI ACUTE ABDOMEN****107 The Acute Abdomen: Plain Films and Contrast Studies, 2020**

Stuart Field

Radiographic techniques, 2020

Chest radiographs, 2020

Abdominal radiographs, 2021

Normal appearances, 2022

Abdominal calcification, 2023

Pneumoperitoneum, 2023

Use of contrast media in suspected perforation, 2026

Pneumoperitoneum without peritonitis, 2026

Conditions simulating a pneumoperitoneum—  
pseudopneumoperitoneum, 2027

Postoperative abdomen, 2028

Intraperitoneal fluid collections—ascites, 2028

Inflammatory conditions, 2029

Acute appendicitis, 2029

Acute cholecystitis, 2031

Mucocele and empyema of the gallbladder, 2032

Acute bile duct obstruction, 2032

Emphysematous cholecystitis, 2032

Acute pancreatitis, 2032

Acute diverticulitis, 2034

Intraabdominal abscesses, 2035

Subphrenic and subhepatic abscesses, 2036

Lesser sac abscess, 2037

Paracolic abscesses, 2039

Pelvic abscesses, 2039

Retroperitoneal abscesses, 2039

Intestinal obstruction, 2042

Gastric dilation, 2042

Duodenal obstruction, 2044

The distinction between small and large bowel dilatation, 2044  
 Small bowel obstruction, 2045  
 Large bowel obstruction, 2057  
 Postoperative abdomen, 2063  
 Acute colitis, 2065  
 Acute inflammatory colitis, 2965  
 Toxic megacolon, 2065  
 Pseudomembranous colitis (*Clostridium difficile*-associated colitis), 2067  
 Amebic colitis, 2067  
 Ischemic colitis, 2068  
 Intramural gas, 2068  
 Cystic pneumatosis (pneumatosis intestinalis), 2068  
 Interstitial emphysema, 2069  
 Gas-forming infections, 2070  
 Emphysematous gastritis, 2070  
 Emphysematous cholecystitis, 2070  
 Emphysematous enterocolitis, 2070  
 Emphysematous cystitis, 2070  
 Renal colic, 2070  
 Leaking abdominal aortic aneurysm, 2071  
 Acute gynecologic disorders, 2073  
 Calcification associated with acute abdominal conditions, 2073

## 108 Computed Tomography of the Acute Abdomen, 2076

Emil J. Balthazar and Alec J. Megibow

Technical considerations, 2076  
 Gastrointestinal perforation and peritonitis, 2077  
 Intraperitoneal air, 2077  
 Extraperitoneal air, 2078  
 Site and etiology of perforation, 2079  
 Peritonitis, 2080  
 Sealed-off perforations, 2080  
 Limitations to the CT diagnosis, 2080  
 Intraperitoneal abscess, 2081  
 Solid organ abscess, 2082  
 Acute inflammatory gastrointestinal lesions, 2084  
 Acute appendicitis, 2084  
 Acute diverticulitis, 2085  
 Acute necrotizing enteritis and colitis, 2086  
 Gangrenous cholecystitis, 2087  
 Intraabdominal hemorrhage, 2087  
 Intestinal ischemia and intramural hemorrhage, 2089  
 Strangulating small bowel obstruction, 2091  
 Abdominal trauma, 2094

## 109 The Acute Abdomen of Gastrointestinal Tract Origin: Sonographic Evaluation, 2099

Stephanie R. Wilson

Sonographic approach, 2099  
 Acute abdomen originating from the hollow viscera, 2101  
 Extraintestinal manifestations of hollow gut disease, 2101  
 Acute appendicitis, 2102  
 Acute terminal ileitis, 2104  
 Acute typhilitis, 2104  
 Acute diverticulitis, 2104  
 Mechanical bowel obstruction, 2106  
 Ischemic bowel, 2108  
 Peptic ulcer, 2108

Acute abdomen of biliary origin, 2108  
 Acute cholecystitis, 2109  
 Biliary colic, 2111  
 Acute abdomen of pancreatic origin, 2112  
 Acute pancreatitis, 2112  
 Acute abdomen of hepatic origin, 2114  
 Acute hepatitis, 2114  
 Complications of preexisting liver masses, 2114  
 Acute abdomen of splenic origin, 2115  
 Epidermoid cysts of the spleen, 2115  
 Splenic infarction, 2115  
 Splenic rupture, 2115  
 Splenic torsion, 2115

## 110 Overview: The Acute Abdomen, 2118

John R. Amberg

The plain films, 2118  
 Ultrasonography, 2119  
 Computed tomography, 2119  
 Other methods, 2119  
 Conclusion, 2119

## PART XVII ABDOMINAL TRAUMA

### 111 Imaging in Abdominal Trauma, 2120

W. Dennis Foley

Blunt injury: mechanism and pattern of injury, 2120  
 Intraperitoneal fluid: CT and diagnostic peritoneal lavage, 2120  
 CT: logistics and technique, 2121  
 CT and patient management, 2122  
 Liver, 2123  
 Spleen, 2130  
 Pancreas, 2133  
 Duodenum, 2133  
 Kidney, 2135  
 Bladder, 2135  
 Mesentery and bowel, 2138  
 Vascular injury, 2139  
 Spinal fracture, 2139  
 Pelvis, 2140  
 Penetrating injuries, 2140  
 Diaphragmatic rupture, 2141  
 Summary, 2141

### 112 Arteriography and Therapeutic Embolization in Abdominal Trauma, 2143

George P. Teitelbaum, Michael D. Katz, and Salvatore J.A. Sclafani

Initial evaluation of the polytrauma patient, 2143  
 Diagnostic arteriography in trauma, 2143  
 Materials and techniques for transcatheter embolization, 2144  
 Arteriography and interventions in the spleen, 2146  
 Arteriography and interventions in hepatic vascular injuries, 2147  
 Arteriography and interventions in the renal vascular injuries, 2149  
 Arteriography and interventions in the pelvis, 2150  
 Miscellaneous injuries, 2153  
 Conclusion, 2153
