
Contents

PART I

Patient Evaluation

1. Overview 3
2. Pre-Urodynamic Evaluation 9
3. Deciding on the Right Urodynamic Equipment 19

PART II

Techniques

4. Cystometry 31
5. Uroflowmetry 48
David A. Rivas, Michael Chancellor
6. Electromyography 60
Clare Fowler
7. Urethral Pressure Profiles 77
8. Synchronous Pressure/Uroflow and Video-urodynamics 88
9. Ambulatory Urodynamics 105
Ernst S.C. van Waalwijk van Doorn, Rudi A. Janknegt
10. Ultrasound Urodynamics 117
Heikki S. Virtanen, Pentti Kiilholma
11. Dynamic Cystoproctography 126
J. Thomas Benson, Frederick M. Kelvin

PART III

Diagnosis

Section A. Neuro-Urology

12. Normal and Abnormal Physiology of Micturition 149
13. Spinal Cord Injury 160
14. Cerebrovascular Accident, Parkinson's Disease,
and Miscellaneous Neurologic Conditions 174

- 15. Multiple Sclerosis and Diabetic Neurogenic Bladder 183
- 16. Cauda Equina, Infectious, and Other Spinal Diseases 192

Section B. Uro-Gynecology

- 17. Classification of Stress Incontinence 205
- 18. Leak Point Pressures in Stress Incontinence 208
Edward J. McGuire and Helen E. O'Connell
- 19. Detrusor Instability, Mixed Incontinence
and Interstitial Cystitis 214

Section C. Male Voiding Disorders

- 20. Benign Prostatic Hyperplasia, Bladder Neck Obstruction,
and Prostatitis 227
- 21. Post-Prostatectomy Incontinence 240

Section D. Pediatric, Geriatric, and Bladder Reconstruction

- 22. Pediatric Urodynamics 251
Julian Wan, Saul P. Greenfield
- 23. Geriatric Urodynamics 271
- 24. Urodynamics in Urinary Tract Reconstruction 283
David A. Rivas, Michael Chancellor
