Humoral Hypercalcemia of Malignancy

<i>By Andrew F. Stewart and Arthur E. Broadus</i>	1
Local Osteolytic Hypercalcemia	1
1,25(OH) ₂ Vitamin D–Secreting Lymphomas	2
Humoral Hypercalcemia of Malignancy	4
The Clinical Syndrome	4
Detection and Purification of Parathyroid Hormone– Related Proteins	6
Identification of Parathyroid Hormone–Related Protein Complementary DNAs and Isolation of the Parathyroid Hormone–Related Protein Gene	8
Peptide Product(s)	10
Implications for Diversity	11
Sites and Control of Parathyroid Hormone–Related Protein Gene Expression	11
Synthetic and Recombinant Parathyroid Hormone– Related Proteins	12
Parathyroid Hormone–Related Protein Immunoassays	16
Summary and Conclusion	17

Cushing's Syndrome: Advances in Diagnosis and Treatment

<i>By D. Lynn Loriaux and Lynnette Nieman</i>	23
The Diagnosis of Cushing's Syndrome	23
The Differential Diagnosis of Cushing's Syndrome	26
Adrenocorticotrophic Hormone–Dependent Causes of Cushing's Syndrome	27
Adrenocorticotrophic Hormone–Independent Causes of Cushing's Syndrome	28
The Treatment of Cushing's Syndrome	29
Pituitary Adenoma Secreting Adrenocorticotrophic Hormone (Cushing's Disease)	29
The Ectopic Secretion of Adrenocorticotrophic Hormone	30
Adrenocorticotrophic Hormone–Independent Cushing's Syndrome	31
Summary	32

Type 1 Diabetes: Immunopathology and Immunotherapy

<i>By Leonard C. Harrison, Iain L. Campbell, Peter G. Colman, Nikola Chosich, Thomas W. H. Kay, Brian D. Tait, Raphael K. Bartholomeusz, Henry J. De Aizpurua, Joan L. Joseph, Shirley Chu, and Wojciech E. Kielczynski</i>	36
Etiology	38
Environmental Factors	38
Genes	40
Preclinical Natural History and Diagnosis	42
Assays Used in Screening Studies	43
Screening Studies	45
Summary	49
Immunopathology	49
Lessons From the Nonobese Diabetic Mouse Model	50
Stages and Mechanisms of Beta Cell Destruction in Humans	51
Strategies to Avert Insulin Dependence in Type 1 Diabetes	63
Lessons from Animal Models	65
Selection of Subjects	66
Definition of Objectives and Monitoring of Intervention Therapy	67
Selection of Therapy: Theory and Practice	68
Concluding Remarks	81

New Directions in the Diagnosis and Treatment of Growth Failure.

<i>By Darrell M. Wilson and Ron G. Rosenfeld</i>	95
Measurement and Recording of Growth Data	95
Differential Diagnosis of Short Stature	97
Laboratory Evaluation	99
Measurement of Growth Hormone	99
Urinary Growth Hormone	102
Growth Hormone Releasing Hormone Stimulation Tests	103
Measurement of Plasma Insulin-Like Growth Factors	104
Other Measures of Insulin-Like Growth Factors	108
Treatment of Growth Failure	108
Response to Growth Therapy	108
Growth Hormone	109
Other Growth-Promoting Therapies	120
Summary	121

Masculinization: A Clinical Approach to the Diagnosis and Treatment of Hyperandrogenic Women.

<i>By Jeffrey I. Mechanick and Andrea Dunaif</i>	129
Pathophysiology of Masculinization	129
Androgen Physiology	129
Clinical Correlates of Hyperandrogenism.	132
Differential Diagnosis and Pathophysiology.	135
Nondisease States	135
Iatrogenic or Factitious Masculinization	136
Masculinizing Forms of Undefined Etiology: Idiopathic Hirsutism and Polycystic Ovary Syndrome	136
Ovarian Masculinizing Conditions	145
Adrenal Masculinizing Conditions	147
Hyperprolactinemia	151
Hypothyroidism	151
Acromegaly	152
Disorders of Sexual Differentiation	152
Anorexia Nervosa and Starvation	152
Insulin Resistance.	152
Obesity	153
Diagnostic Strategy	153
Whom to Evaluate	153
Specific Issues in History-Taking Physical Examination	154
Initial Laboratory Studies.	155
Further Diagnostic Studies	157
Therapeutic Options	159
Goals of Therapy.	159
Therapeutic Modalities.	161

Somatostatin and Somatostatin-like Peptides: Clinical Research and Clinical Applications.

<i>By Thomas M. O'Dorisio and Jan S. Redfern</i>	175
Structure of Somatostatin	176
Distribution of Somatostatin Peptides	178
Metabolism of Somatostatin	181
Actions of Somatostatin	182
Somatostatin Receptors	182
Intracellular Mediators of Somatostatin Action.	183
Somatostatin in Specific Organ Systems	184
Anterior Pituitary Gland	184

Gastrointestinal Tract	187
Miscellaneous Organs	194
Gastroenteropancreatic Tumors	194
Other Tumors	216
Summary	216
Morning Hyperglycemia in Insulin-Dependent Diabetes Mellitus: Insulin Lack Vs. the Dawn and Somogyi Phenomena.	
<i>By Philip E. Cryer</i>	231
Hypoglycemia and Glucose Counterregulation	231
The Dawn Phenomenon	232
The Somogyi Phenomenon	236
Conclusions	239
Treatment of Male Hypogonadism	
<i>By Peter J. Snyder</i>	245
Male Hypogonadism	245
Androgens and Other Agents for Treating Male Hypogonadism	247
Testosterone	247
17-Aklylated Androgens and Androgens With a Modified Steroid Nucleus	251
Testosterone Esters	250
Gonadotropins and Gonadotropin-Releasing Hormone	253
Treatment of Testosterone Deficiency	255
Testosterone Esters	255
Transdermal Administration of Testosterone	255
Human Chorionic Gonadotropin	256
Treatment of Infertility	256
Human Chorionic Gonadotropin and Human Menopausal Gonadotropin	257
Gonadotropin-Releasing Hormone	257
Conclusion	259
Pituitary Tumors.	
<i>By Janet A. Schlechte and Ronald A. Iverson</i>	261
Prolactinomas	261
Diagnostic Evaluation	262
Treatment	263
Growth Hormone-Secreting Tumors	266
Diagnostic Evaluation	267
Treatment	268

Nonfunctioning Tumors	271
Diagnostic Evaluation	271
Treatment	272
The Effects of Genetics, Diet, and Hormones on Lipid and Lipoprotein Metabolism.	
<i>By Margo A. Denke and Scott M. Grundy</i>	283
Pathways of Lipoprotein Metabolism	284
Very-Low-Density Lipoproteins	284
Low-Density Lipoproteins	285
Lipoprotein (a).	285
High-Density Lipoproteins	286
Genetic Determinants of Serum Lipoprotein Levels	286
Low-Density Lipoprotein Receptors.	286
Apolipoprotein B-100	287
Apolipoprotein E	288
Apolipoprotein C	289
Apolipoprotein As	290
Lipoprotein Lipase	290
Hepatic-Triglyceride Lipase	291
Lecithin-Cholesterol Acyltransferase	291
Dietary Regulation of Serum Lipoprotein Levels.	291
Dietary Fats	292
Carbohydrates.	295
Calories	295
Endocrine Effects on Lipoprotein Metabolism.	295
Thyroid Hormone	295
Insulin	297
Corticosteroids.	299
Sex Hormones.	300
Index	317
