Preface	vii
Acknowledgements	x
1. Programme considerations	1
Introduction	1
The role of vasectomy	1
History and current trends	3
Factors affecting availability and acceptance	6
Advantages and disadvantages	14
2. Vasectomy and the health care system	18
Service-delivery channels	18
Surgical personnel for vasectomy	24
Important links: client follow-up and medical referrals	25
Vasectomy reversal: some programming considerations	26
3. Organizing and managing a vasectomy programme	27
Essential steps in organizing services	27
Identifying potential obstacles	27
Estimating potential case-load	29
Facilities	30
Client flow	31
Staffing	31
Financing	33
Special characteristics of successful programmes	34
4. Information, communication and counselling	37
The roles of information and communication	37
The client decision-making process	38
Public information and communication	41
Referral systems	46
Clinic-based information and communication	48
Client assessment and counselling	50
Additional sources of information	55

5. Preoperative care	56
Psychological screening	56
Medical screening	56
Laboratory tests	57
Instructions before surgery	58
Skin preparation	58
6. The vasectomy procedure	59
Facilities	59
Asepsis	59
Preoperative medication	60
Surgical procedure	60
Vasectomy technique without scalpel	64
7. Postoperative care	65
Immediate complications	65
Postoperative instructions and care	65
Medication	66
Follow-up	66
Semen analysis	67
Psychological support	67
Long-term follow-up	68
8. Complications and side-effects	69
Intraoperative complications	69
Short-term effects	69
Postoperative complications	69
Factors affecting the incidence of complications	71
Long-term physical effects	72
Psychological effects	73
Mortality	73
9. Effectiveness	75
Failure rates	75
Causes of failure	75
Safeguarding against failure	76
10. Reversal	77
Success rates	77
Factors influencing the success of reversal	77
Anastomosis technique	78
Provision of services	79

11. Instruments, equipment and supplies	80
Instruments	80
Equipment	81
Maintenance and logistics	84
12. Training	86
Knowledge, skills and tasks	87
Training institutions	87
Requirements for surgical trainers	90
Criteria for selecting trainees	90
Evaluation and certification of trainees	91
13. Evaluation	92
Purposes of evaluation	92
Some basic evaluation principles	92
Evaluation topics and indicators	93
Non-routine studies and surveys	95
Medical research issues	98
References	99
Bibliography	102
Annex 1. Sources of technical and funding assistance for vasectomy programmes	103
Annex 2. Sample question-and-answer brochure/ pamphlet for vasectomy clients	108
Annex 3. Sample postoperative instructions to clients (oral and written)	112
Annex 4. Kits available from UNICEF	114
Annex 5. Model curriculum for a vasectomy training programme	116
Annex 6. Guidelines for developing and using client medical record forms for vasectomy programmes	124
Annex 7. Additional sources of information	125
