

CONTENTS

Foreword	i
Preface	v
I. A HISTORICAL VIEW	1
A. Definition of Pneumoconiosis	1
B. Pulmonary Dysfunction and Pathological Findings	2
C. History of Pulmonary Dysfunction in Pneumoconiosis	4
II. METHODS OF MEASUREMENT IN PULMONARY FUNCTION TESTS	7
A. Spirometry	7
1. Vital Capacity	7
(1) Definition	
(2) Methods of Measurement	
(3) Factors Influencing Vital Capacity	
(4) Relationships among the Vital Capacity, Total Lung Capacity and Static Pressure-volume Curve	
2. Maximal Forced Expiratory Curve (Tiffeneau Test)	10
(1) Recording of the Maximal Forced Expiratory Vital Capacity (VC) Curve	
(2) Factors Limiting the Maximal Forced Expiratory VC Curve	
(3) FEV ₁	
(4) FEV ₁ %	
(5) Check Valve Index	
3. Ventilatory Dysfunction Diagnosed from the Vital Capacity and FEV ₁ %	12
4. Maximal Mid-expiratory Flow	13
5. Maximal Breathing Capacity	13
6. Respiratory Minute Volume	13
B. Functional Residual Capacity and Residual Volume	13
1. Difference between Functional Residual Capacity and Residual Volume	13
(1) Functional Residual Capacity	
(2) Total Lung Capacity	
2. Methods of Measurement	14
(1) Principles of Measurement by Closed Circuit Method	
3. Assessment of Residual Volume	16
4. Volume of the Alveolar Air Space	16
(1) Methods of Measurement	
(2) Bullae and Respiratory Failure	
C. Analysis of Arterial Blood Gases	17
1. Explanation of Analysis of Arterial Blood Gases	17
(1) Arterial Tension of Oxygen (PaO ₂)	
(2) Arterial Tension of Carbon Dioxide (PaCO ₂)	
(3) Acid-base Balance	

2. Arterial Blood Collection	19
(1) Conditions of Blood Collection	
(2) Methods of Blood Collection	
3. Methods of Measurement	20
4. Assessment	20
(1) Assessment of Arterial Tension of Oxygen (P_{aO_2})	
(2) Assessment of Arterial Tension of Carbon Dioxide (P_{aCO_2})	
D. Diffusing Capacity of the Lung	22
1. Explanation of Pulmonary Gas Diffusion	22
2. Principles of Measurement	22
3. Methods of Measurement	23
4. Measurement of the Diffusing Capacity of the Alveolar Membrane (DM) and Blood Volume of the Pulmonary Capillary Vessels (VC)	25
(1) Principles of Measurement of DM and VC	
(2) Methods of Measurement	
5. Factors Influencing the Diffusing Capacity	27
6. Cardiopulmonary Diseases and Diffusing Capacity of the Lung	28
(1) Primary Impairment of Diffusion	
(2) Secondary Impairment of Diffusion	
E. Mechanics of the Lung	28
1. Explanation of Tests of Mechanics of the Lung	28
2. Methods of Measurement	29
(1) Measurement of Esophageal Pressure	
(2) Measurement of Airflow Rate	
(3) Measurement of Ventilatory Volume	
(4) Measurement of Static Pressure-volume Curve of the Lung	
(5) Measurement of Dynamic Compliance	
(6) Measurement of Resistance	
3. Factors Influencing the Static Pressure-volume Curve of the Lung	35
4. Factors Influencing Resistance	35
F. Flow-volume Curve	35
1. Explanation of Flow-volume Curve	35
2. Methods of Measurement of MEFV (Maximal Expiratory Flow-volume) Curve	36
3. Assessment of $\dot{V}_{max}$	36
4. Flow-volume Curve in Pulmonary Diseases	38
5. Application of Flow-volume Curve	38
(1) Flow-volume Curve after Administration of Drugs	
(2) Helium-oxygen Flow-volume Curve	
(3) Measurement of Upstream Resistance	
(4) Partial Expiratory Flow-volume Curve	
(5) Flow-volume Curve after Resistance Loading	
G. Gas Distribution Tests	40
1. Explanation of Uneven Distribution of Gases	40
2. Methods of Measurement	40
(1) Single Breath Method	
(2) Multiple Breath Method	
3. Analysis and Assessment of Multiple Nitrogen Washout Method	42
4. Mechanism of Abnormal Gas Distribution in the Lung	43
5. Pathophysiological Significance of Abnormal Gas Distribution in the Lung	43
H. Closing Volume	43
1. Explanation of Closing Volume	43

2. Methods of Measurement	44
(1) Bolus Method	
(2) Resident Gas Method	
3. Factors Influencing Measurement of Closing Volume	44
4. Diseases and Closing Volume	44
I. Assessment Standards of Pulmonary Function Tests in Pneumoconiosis	45
1. Normal Values and Ranges	45
(1) Spirometry	
(2) Residual Volume (RV) and Total Lung Capacity (TLC)	
(3) Blood Gases	
(4) Mechanics of the Lung	
(5) Pulmonary Diffusing Capacity	
(6) Airway Resistance	
(7) Flow-volume Curve	
(8) Closing Volume (CV)	
2. Pulmonary Function Test System and Assessment of Results under the Present Pneumoconiosis Law	47
(1) Pulmonary Function Test System	
(2) Assessment of Data from the Tests	
III. RESULTS OF PULMONARY FUNCTION TESTS IN PNEUMOCONIOSIS	54
A. Comparison between Chest X-ray Findings and Pulmonary Function Tests Results in Silicosis	56
1. Cases Having Small Rounded Opacities Less than 1.5 mm in Diameter (p)	56
Cases 1 to 11	
2. Cases Having Small Rounded Opacities 1.5 to 3 mm in Diameter (q)	68
Cases 12 to 22	
3. Cases Having Small Rounded Opacities 3 to 10 mm in Diameter (r)	79
Cases 23 to 25	
4. Cases Having Irregularly Shaped Opacities (s)	82
Cases 26 to 33	
5. Cases Having Irregularly Shaped Opacities (t)	91
Cases 34 to 36	
B. Comparison between Lung Morphology at Autopsy and Pulmonary Function Tests in Silicosis	94
Cases 37 to 46	
C. Comparison of Findings from Selective Alveolo-bronchography (SAB) and Pulmonary Function Tests	111
Cases 47 to 59	
D. Results of Pulmonary Function Tests in Pneumoconiosis Other than Silicosis	138
1. Characteristic Results of Pulmonary Function Tests in Pneumoconiosis Caused by Iron Oxide	138
Case 60	
2. Characteristic Results of Pulmonary Function Tests in Asbestosis	141
Cases 61 to 64	
3. Characteristic Results of Pulmonary Function Tests in Carbon Pneumoconiosis	149
Cases 65 to 69	
4. Characteristic Results of Pulmonary Function Tests in Aluminum Pneumoconiosis	155
Case 70	

5. Characteristic Results of Pulmonary Function Tests in Pyrophyllite Pneumoconiosis	156
Case 71	
6. Characteristic Results of Pulmonary Function Tests in Coal Worker's Pneumoconiosis	157
7. Characteristic Results of Pulmonary Function Tests in Talc Pneumoconiosis	158
8. Characteristic Results of Pulmonary Function Tests in Diatomite Pneumoconiosis...	158
9. Characteristic Results of Pulmonary Function Tests in Beryllium Pneumoconiosis...	158
 IV. SPIROMETRY, ANALYSIS OF ARTERIAL BLOOD GAS, DEGREES OF DYSPNEA, AND RESULTS OF OTHER PULMONARY FUNCTION TESTS.....	160
A. Comparison between Spirogram and Results of Other Pulmonary Function Tests	160
1. Results of Pulmonary Function Tests in the Group with Normal Spirograms	160
2. Results of Pulmonary Function Tests in the Group with Abnormal Spirograms	162
B. Relation of Arterial Blood Gas to Other Pulmonary Function Tests	163
C. Degrees of Dyspnea and Results of Pulmonary Function Tests	166
 V. CHARACTERISTIC PULMONARY DYSFUNCTION IN SILICOSIS	169
A. Principal Component Analysis	169
B. Findings on Chest X-ray Films and Pulmonary Function Tests	171
C. Similarities of Pulmonary Function Tests between Fibrotic Lung Disease (FLD) and Silicosis	176
<Endnote 1> Differences in the Restrictive Disorders in Idiopathic Fibrosis and in Silicosis	
<Endnote 2> Results of Pulmonary Function Tests in Chronic Obstructive Pulmonary Disease (COPD)	
 VI. A NEW APPROACH TO PULMONARY DYSFUNCTION IN PNEUMOCONIOSIS...	183
A. Small Airway Disease in Silicosis	183
1. Purpose	183
2. Explanation of Small Airway Disease	183
(1) Flow-volume Curve	
(2) Closing Volume	
(3) Frequency Dependency of Dynamic Compliance	
(4) The Alveolar-arterial Tension Difference (AaDO ₂)	
(5) Upstream Resistance	
3. Combination of Results of Individual Pulmonary Function Tests	188
B. Airway Hypersensitivity in Silicosis	190
1. Mechanisms Causing Airway Narrowing.....	190
2. Test of Hypersensitivity of the Airways	191
3. Comparison of Airway Hypersensitivity in Silicosis with that in Other Diseases	193
C. Exercise Tests in Silicosis	195
1. Purpose	195
2. Pulmonary Function during Exercise.....	195
(1) Ventilatory Response	
(2) Changes in Arterial Blood Gases and Alveolar Gases	

(3) Diffusing Capacity of the Lung	
(4) Changes in Blood Properties	
3. Response to Exercise in Pulmonary Disease	196
(1) Chronic Obstructive Pulmonary Disease	
(2) Restrictive Pulmonary Disease	
4. Response to Exercise in Silicosis	198
(1) Ventilatory Response during Exercise	
(2) Changes in Blood Gas Composition during Exercise	
<Supplement> Calculation of the Ventilatory Index	
(3) Diffusing Capacity of the Lung during Exercise in Silicosis	
D. Changes in Chest X-ray Findings and Results of Pulmonary Function Tests with Time ...	205
1. Investigation of Individual Cases	205
(1) Cases without Changes in Chest X-ray Findings, but with Changes	
in Pulmonary Function Tests	
Cases 72 to 76	
(2) Cases with Changes in Both Chest X-ray Findings and Pulmonary Function Tests	
Cases 77 to 85	
2. Changes in Chest X-ray Findings and Results of Pulmonary Function Tests	
over Time	231
(1) Changes in Chest X-ray Findings over Time	
(2) Changes in Pulmonary Function Test Results over Time	
Conclusion	234
Index	237
