

TABLE OF CONTENTS

Chapter	1	The Microbial World	1
Chapter	2	Bacterial Cytology	5
		Optical Methods 5	
		Cell Structure 6	
		Staining 13	
		Morphological Changes During Growth 15	
Chapter	3	Bacterial Metabolism	16
		Part I - General 16	
		Part II - Catabolic Reactions Involved in Chemosynthesis 20	
		Part III - Chemosynthetic Organisms 28	
		Part IV - Storage and Utilization of Energy 33	
		Part V - Photosynthesis 37	
		Part VI - Nutrition 40	
		Part VII - Cycles of Elements in Nature 43	
Chapter	4	Bacterial Variation	47
		The Physical Basis of Heredity and Variation 47	
		The Relation of Genotype to Phenotype 48	
		The Origin of New Genotypes in Bacteria 48	
		Mutation 49	
		Transmission of Genetic Material 51	
		Selection 54	
		Adaptation 55	
Chapter	5	Cultivation of Bacteria	56
		Environmental Factors Affecting Growth 56	
		Cultivation Methods 57	
Chapter	6	Classification of Bacteria	62
		Principles of Classification 62	
		Taxonomically Useful Properties 65	
		Taxonomy According to Bergey's Manual 66	
		Some Natural Groups of Bacteria 69	
Chapter	7	The Microbiology of Special Environments	74
Chapter	8	Antibacterial Agents	82
		General Principles 82	
		Some Useful Antibacterial Agents 85	
Chapter	9	Chemotherapy	89
		Selective Toxicity 89	
		Drug Resistance 90	
		Drug Dependence 91	
		Antimicrobial Activity in Vitro 91	
		Antimicrobial Activity in Vivo 92	
		Clinical Use of Antibiotics 94	
		Combined Antibiotic Action 95	
		Antimicrobial Drugs for Local (Topical) Application 96	
		Antimicrobial Drugs for Systemic Administration 97	
Chapter	10	Host-Parasite Relationships.	105
		Infection 105	
		Attributes of Microorganisms Which Enable Them to Cause Disease 106	

Chapter 10	Host-Parasite Relationships (Cont'd.)	
	Attributes of the Host Which Determine Resistance to Microorganisms	107
	Natural Mechanisms of Nonspecific Host Resistance	108
	Resistance and Immunity	109
	Allergy and Hypersensitivity	111
	Immediate or Anaphylactic Type of Hypersensitivity Reactions	112
	Delayed or Tuberculin Type of Hypersensitivity Reactions	116
	Allergy to Drugs and Simple Chemicals	118
	Chronic Hypersensitivity Diseases	119
Chapter 11	Antigens and Antibodies	121
	Antigens	121
	Antibodies	122
	Serological Reactions	125
Chapter 12	Pyogenic Cocci	132
	The Staphylococci	132
	The Streptococci	135
	The Pneumococci	142
	The Neisseriae	144
Chapter 13	Gram-Positive Bacilli	149
	Aerobic Sporeforming Bacilli	149
	Anthrax	149
	Anaerobic Sporeforming Bacilli	151
	The Clostridia	151
Chapter 14	Corynebacteria	156
Chapter 15	Mycobacteria	160
	<i>M. tuberculosis</i>	160
	<i>M. leprae</i>	165
Chapter 16	Enteric Gram-Negative Microorganisms	166
	Coliform Bacteria	166
	The Proteus Group	169
	<i>Pseudomonas aeruginosa</i>	169
	The Salmonellae	169
	The Shigellae	173
	Vibrios	175
Chapter 17	Small Gram-Negative Bacilli	178
	The Brucellae	178
	The Pasteurellae	180
	The Hemophilic Bacteria	185
Chapter 18	Miscellaneous Pathogenic Microorganisms	190
Chapter 19	Spirochetes and Other Spiral Microorganisms	194
	<i>Treponema pallidum</i> and Syphilis	194
	Diseases Related to Syphilis	197
	<i>Borrelia recurrentis</i> and Relapsing Fever	198
	Leptospirae and the Leptospiroses	200
	Miscellaneous Spiral Organisms	202
Chapter 20	Medical Mycology	203
	Structures of Fungi	203
	The Actinomycetes and Actinomycosis	205
	Superficial Mycoses Dermatophytoses	208
	Deep Mycoses	212
Chapter 21	Normal Microbial Flora of the Human Body	224
Chapter 22	Principles of Diagnostic Medical Microbiology	227
	Selection of Laboratory Investigations	228
	Gram and Acid-Fast Staining Methods	229
Chapter 23	Rickettsial Diseases	231
Chapter 24	General Properties of Viruses	238
	Classification	238
	General Properties	239
	Propagation of Viruses	240
	Evolution of Viruses	240
	Measuring the Sizes of Viruses	241
	Identification of a New Virus	242

Chapter 24	General Properties of Viruses (Cont'd.)	
	Reaction to Physical and Chemical Agents	242
	Cultivation of Viruses	243
	Mutation of Viruses	244
Chapter 25	Isolation of Viruses From Clinical Specimens	251
	Complicating Factors in the Diagnosis of Viral Diseases	251
	Methods of Procedure	252
Chapter 26	Serological Diagnosis of Virus Infections	257
	Neutralization Tests	257
	Complement Fixation Tests	261
	Hemagglutination-Inhibition Tests	263
	Sheep Cell Agglutination	264
	Tests for Dermal Hypersensitivity (Skin Tests)	266
Chapter 27	Arthropod-Borne Viral Diseases	269
	Virus Encephalitides	269
	West Nile Fever	273
	Yellow Fever	274
	Dengue Fever	277
	Sandfly Fever	280
	Colorado Tick Fever	281
Chapter 28	Non-Arthropod-Borne Viral Diseases of the Nervous System	282
	Poliomyelitis	282
	Rabies	287
	Encephalitis Lethargica	291
	Aseptic Meningitis	291
	Lymphocytic Choriomeningitis	292
	B Virus Infection	294
Chapter 29	Exanthematous Viral Diseases	295
	Smallpox and Related Virus Infections	295
	The Varicella-Zoster Group	301
	Varicella, Zoster	301
	Measles	303
	Rubella	306
	Exanthem Subitum	307
	Herpes Simplex	307
Chapter 30	Viral Diseases of the Respiratory Tract and Parotid Glands	310
	Influenza	310
	The Common Cold	314
	Acute Respiratory Disease	316
	Mumps	318
Chapter 31	Viral Diseases of the Liver	322
	Infectious Hepatitis	322
	Serum Hepatitis	322
Chapter 32	Psittacosis-Lymphogranuloma Group	326
	Psittacosis	326
	Lymphogranuloma Venereum	329
	Trachoma and Inclusion Conjunctivitis	331
Chapter 33	Coxsackie Group	334
Chapter 34	Miscellaneous Viral Infections of Man	338
Chapter 35	Bacteriophage	344
	Life Cycles of Phage and Host	344
	Methods of Study	345
	Properties of Phage	346
	Phage Reproduction	347
	Phage Genetics	349
	Lysogeny	350
	Phage as Therapeutic Agent	352
Appendix		353
